Nuremberg Evil On Trial:

Nuremberg James Owen, 2006 Sixty years ago between November 1945 and October 1946 21 Nazi leaders took the stand in Nuremberg They had committed atrocities that had appalled the world and at an unprecedented international tribunal the world was determined to see justice done Nuremberg Evil on Trial is the inside view of the greatest trial in history

Holocaust, Genocide, and the Law Michael Bazyler, 2016-10-25 A great deal of contemporary law has a direct connection to the Holocaust That connection however is seldom acknowledged in legal texts and has never been the subject of a full length scholarly work This book examines the background of the Holocaust and genocide through the prism of the law the criminal and civil prosecution of the Nazis and their collaborators for Holocaust era crimes and contemporary attempts to criminally prosecute perpetrators for the crime of genocide It provides the history of the Holocaust as a legal event and sets out how genocide has become known as the crime of crimes under both international law and in popular discourse It goes on to discuss specific post Holocaust legal topics and examines the Holocaust as a catalyst for post Holocaust international justice Together this collection of subjects establishes a new legal discipline which the author Michael Bazyler labels Post Holocaust Law

A History of the Laws of War: Volume 1 Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful

combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

A History of the Laws of War: Volume 2 Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

A History of the Laws of War: Volume 3 Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself

The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Anatomy of Malice Joel E. Dimsdale, 2016-05-28 An eminent psychiatrist delves into the minds of Nazi leadership in a fresh look at the nature of wickedness and at our attempts to explain it Sir Simon Wessely Royal College of Psychiatrists When the ashes had settled after World War II and the Allies convened an international war crimes trial in Nuremberg a psychiatrist Douglas Kelley and a psychologist Gustave Gilbert tried to fathom the psychology of the Nazi leaders using extensive psychiatric interviews IQ tests and Rorschach inkblot tests The findings were so disconcerting that portions of the data were hidden away for decades and the research became a topic for vituperative disputes Gilbert thought that the war criminals malice stemmed from depraved psychopathology Kelley viewed them as morally flawed ordinary men who were creatures of their environment Who was right Drawing on his decades of experience as a psychiatrist and the dramatic advances within psychiatry psychology and neuroscience since Nuremberg Joel E Dimsdale looks anew at the findings and examines in detail four of the war criminals Robert Ley Hermann Goering Julius Streicher and Rudolf Hess Using increasingly precise diagnostic tools he discovers a remarkably broad spectrum of

pathology Anatomy of Malice takes us on a complex and troubling quest to make sense of the most extreme evil In this fascinating and compelling journey a respected scientist who has long studied the Holocaust asks probing questions about the nature of malice I could not put this book down Thomas N Wise MD Johns Hopkins University School of Medicine This harrowing tale and detective story asks whether the Nazi War Criminals were fundamentally like other people or fundamentally different T M Luhrmann author of How God Becomes Real *The Nuremberg Trials* Paul Roland,2012-06-26 Roland s compelling account is highly readable Nicholas Goodrick Clarke Professor of History University of Exeter Anyone wishing to understand the nature of evil can do no better than look within the pages of this book When Hitler s thousand year Reich collapsed after twelve years of increasing repression how were those responsible to be punished Hitler Himmler and Goebbels took their own lives to evade justice but that still left Hermann Goering Albert Speer Hitler s one time Deputy Fuhrer Rudolf Hess and many other prominent Nazis to be brought before the Allied courts This is the story of the Nuremberg Trials the most important criminal hearings ever held which established the principle that individuals will always be held responsible for their actions under international law and which brought closure to World War II allowing the reconstruction of Europe to begin War Crimes and War Crime Trials John C. Watkins,John Paul Weber,2006 This is both a casebook of selected war crime decisions by various national and international tribunals in the twentieth and early twenty first centuries as well as a brief historical account of the geopolitical diplomatic and military events surrounding them The text is divided into six parts arranged in chronological order beginning with the Hague Peace Conferences of 1899 and 1907 up to the Summer 2004 decisions by the Supreme Court of the United States which dealt with transnational terrorism committed by United States citizens as well as the Guantanamo Bay Cuba detainees held under the authority of the Bush Administration War Crimes and War Crime Trials contains edited excerpts from forty four judicial opinions embellished with a congeries of international national military and political documents that add context to the case law The editors have included fairly extensive selections from some of the major materials that have surrounded subsequent war crime litigation Also included are an epilogue by Michael Ignatieff an eleven entry appendix a glossary containing over 200 words a reference section of over 1 400 citations from a wide variety of legal historical and international relations literature and a name and subject index War Crimes and War Crime Trials From Leipzig to the ICC and Beyond Cases Materials and Comments edited by John C Watkins Jr and John Paul Weber is the most complete book on the subjects to date In these challenging times it is an essential reference for all who study or are engaged in the events brought about by September 11 2001 Frank J Williams Chief Justice of the Supreme Court of Rhode Island and Member of the Military Commissions Review Panel Skillfully edited the book weaves together an eclectic tableau of primary and secondary sources drawn from major court decisions and scholarly commentary over the past century The result is a versatile stand alone text and reference that should appeal to students of law political science criminal justice history and international relations alike CHOICE Magazine **The Fallacy of Race**

and the Shoah Naomi Kramer, Ronald Headland, 1998 Naomi Kramer and Ronald Headland use the example of the individual to approach universal issues that inevitably arise in discussing the Holocaust evil courage human dignity moral responsibility and the existential qualities of humankind This book consists of two main sections the first involves interpretation and reflections on the meaning of one individual's experiences during the Shoah The second section sets forth the historical content in which these experiences occurred It contains a comprehensive historical summary of the Shoah and represents a succinct synopsis of existing secondary literature and primary sources *Nürnberger Prozesse : Völkerstrafrecht Seit 1945* Herbert R. Reginbogin, Christoph Johannes Maria Safferling, 2006 60 years after the trials of the main German war criminals the articles in this book attempt to assess the Nuremberg Trials from a historical and legal point of view and to illustrate connections contradictions and consequences In view of constantly reoccurring reports of mass crimes from all over the world we have only reached the halfway point in the quest for an effective system of international criminal justice With the legacy of Nuremberg in mind this volume is a contribution to the search for answers to questions of how the law can be applied effectively and those committing crimes against humanity be brought to justice for their actions War Crimes, War Criminals, and War Crimes Trials Norman E. Tutorow, Karen Winnovich, 1986-08-18 4 500 entries annotated mostly English and German with some material in other European languages Includes books articles dissertations microfilms and tapes and information on the location of documents Sections IV VI pp 105 256 deal with war crimes in Europe during World War II the Holocaust and concentration camps listing 34 specific camps apart from the general material Section IX pp 283 342 is devoted to the Nuremberg International Military Tribunal and section XII pp 408 428 lists material on the Eichmann trial in 1961 **Ghostwriters** Judith Nysenholc, 1996 **Religion, Race, Rights** Eve Darian-Smith, 2010-05-20 Eve Darian Smith takes us on an amazing journey spanning four centuries brilliantly illuminating the continuously evolving interplay of law religion and race in the Anglo American experience This wonderfully readable book is imaginatively organized around a series of eight law moments that ingeniously show how legal rights are subtly shaped by culturally prevailing ideas about religion and race Richard Falk Albert G. Milbank Professor of International Law Emeritus Princeton University *Moscow Journal of International Law*, 1995 *The Literary Review*, 2006 *Law and Catastrophe* Austin Sarat, Lawrence Douglas, Martha Merrill Umphrey, 2007-06-18 The study of catastrophe is a growth industry Today cosmologists scan the heavens for asteroids of the kind that smashed into earth some ninety million years ago leading to the swift extinction of the dinosaurs Climatologists create elaborate models of the chaotic weather and vast flooding that will result from the continued buildup of greenhouse gases in the planet's atmosphere Terrorist experts and homeland security consultants struggle to prepare for a wide range of possible biological chemical and radiological attacks aerated small pox virus spread by a crop duster botulism dumped into an urban reservoir a dirty bomb detonated in a city center Yet strangely law's role in the definition identification prevention and amelioration of catastrophe has been largely neglected The relationship between law

and other limiting conditions such as states of emergency has been the subject of rich and growing literature. By contrast little has been written about law and catastrophe. In devoting a volume to the subject the essays authors sketch the contours of a relatively fresh yet crucial terrain of inquiry. Law and Catastrophe begins the work of developing a jurisprudence of catastrophe.

A History of Political Trials John Laughland, 2008. This is a formidable and well documented counterblast to a developing modern orthodoxy expressing a point of view that many readers will not even have suspected existed let alone read. Anthony Daniels, *Spectator*. A useful and controversial contribution to the debate about victor's justice and a valuable warning that international war crimes tribunals need to operate with precision and care. Jonathan Steele, *Guardian*. The rapid development of the use of international courts and tribunals to try heads of state for genocide and other crimes against humanity has been welcomed by most people because they think that the establishment of international tribunals and courts to try notorious dictators represents a triumph of law over impunity. In *A History of Political Trials* John Laughland takes a very different and controversial view namely that political trials are inherently against the rule of law and almost always involve the abuse of process as well as being seriously hypocritical. By means of detailed consideration of the trials of figures as disparate as Charles I, Louis XVI, Erich Honecker and Saddam Hussein Laughland shows that the guilt of the accused has always been assumed in advance that the judges are never impartial that the process is always unfair and biased in favor of the prosecution that the defense is not permitted to use all the arguments at its disposal and that often the accusers have done exactly what they accuse the defence of having done. All the trials he recounts were marked by arbitrariness and injustice often gross injustice. Although the chapters are short and easy to read they are the fruit of formidable erudition and wide reading. The general reader will be forced by this book to re-examine the ideas on this subject and will be much less sanguine about the possibility of bringing dictators and other leaders to genuine justice. John Laughland lives in Bath and is an author, journalist and has been a university lecturer in France. He has published *The Tainted Source*, *The Undemocratic Origins of the European Idea*, Time Warner Paperbacks and has written for the *Spectator*, *the Economist* and *The New York Times*.
