## OVERVIEW

The OC45 features a canister with increased pressure rating for higher performance and a flip-top firing mechanism with use indicator for safe and reliable operation. It leverages advanced bag on valve technology to separate the pepper solution from the propellant gas and provide omnidirectional functionality (the unit works upside down). The system is entirely free from CFC or combustible propellant gases and is compatible with electronic immobilization devices due to a non-combustible pepper gel formulation.

The configuration of the system can be altered with respect to pepper strength, canister size and nozzle type to suit tactical requirements.
