Learning Directory ,1970 *Rise of the Far Right* Melody Devries, Judith Bessant, Rob Watts, 2021-07-29 After decades on the social and political margins far right groups and movements are enjoying increasing success and even claiming a place in mainstream electoral politics in many Western political systems Research shows that new media like Twitter YouTube and community sites like 4chan and Reddit are increasingly involved with the mobilization of popular support for far right electoral campaigns and even organized political violence These technologies including other social media discussion websites certain online games chat servers talk radio cable news and print media are making contemporary far right ideologies possible in diverse ways altering methods of recruitment to the extent that they become unrecognizable from far right movements of the past and thus more dangerous The results of these new technological processes can be seen in the increasing normalization of far right values within mainstream culture politics and media ecosystems within countries from the United States Britain Australia Germany and Hungary This book brings together recent academic research exploring how far right groups use new media to recruit followers to extremist beliefs and mobilize political action In doing so the book reveals the complex ways that evolving technologies are used both purposively subtly and in some cases incidentally to recruit and mobilize far right support **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1971 *Technology* Eric Schatzberg, 2018-11-12 In modern life technology is everywhere Yet as a concept

technology is a mess In popular discourse technology is little more than the latest digital innovations Scholars do little better offering up competing definitions that include everything from steelmaking to singing In *Technology Critical History of a Concept* Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history one shaped by persistent tensions between scholars and technical practitioners Since the time of the ancient Greeks scholars have tended to hold technicians in low esteem defining technical practices as mere means toward ends defined by others Technicians in contrast have repeatedly pushed back against this characterization insisting on the dignity creativity and cultural worth of their work The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century It was only in the twentieth century that modern meanings of technology arose technology as the industrial arts technology as applied science and technology as technique Schatzberg traces these three meanings to the present day when discourse about technology has become pervasive but confusion among the three principal meanings of technology remains common He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world
