**Firm, Equity Asset, and Fixed Income Securities Valuation** Vusani Moyo, 2024-08-12 This textbook begins by introducing the concept of the time value of money and explaining how it is applied in valuation It then uses practical and easy to understand examples to illustrate the application of the time value of money concept in valuing cash flows annuities and perpetuities This is followed by an in depth discussion of the firm's financing sources and the determination of its cost of capital The remainder of the textbook discusses the valuation of fixed income securities equity assets and the firm featuring specific examples and case studies from South Africa Europe and the Americas Equity asset and firm valuation approaches discussed include variants of single and multiple stage growth dividend discount models free cash flows residual income and multiple valuation approaches The practical examples and case studies equip students with the tools they need to apply these valuation approaches Aimed at upper undergraduate and postgraduate accounting and finance students this textbook discusses in which context each valuation approach is most appropriate Electronic supplementary materials are available online by chapter

*The Debt Market: Testing, portfolio management, and special effects* Stephen A. Ross, 2000 This three volume collection presents published articles on the debt market It focuses first on the classical bond market and moves on to a discussion of rational expectations estimation and the term structure This is followed by an examination of rational temporal analyses the modern theory of the term structure and modelling of stochastic movements The third section discusses implementation including techniques taxation and the management of interest rate risk

**Inflation-indexed Securities** Mark Deacon, Andrew Derry, Dariush Mirfendereski, 2004-04-21 The global market for inflation indexed securities has ballooned in recent years and this trend is set to continue This book examines the rationale behind issuance and investment decisions and details the issues facing anyone who designs indexed securities illustrating them wherever possible with actual examples from the international capital markets In particular an extensive review of indexed debt markets throughout the world is provided including for the first time a comprehensive and consistent set of cash flow and price yield equations for the instruments already in existence in the major bond markets forming an important reference for those already experienced in the field as well as practitioners and academics approaching the subject for the first time The book also provides unique insight into the development of inflation indexed derivative products and the analytical tools required to value such instruments

**The Political Economy and Ethics of Debt Financing** Patrick O'Sullivan, Paolo

Ricci,2024-12-04 This book takes a fresh look at an age old controversy in ethics and political economy that stretches right back to Aristotle the morality and the economics of debt financing or the charging of interest on loans It endeavours to show the immense relevance of those ancient debates in the contemporary economy Outside of countries which practise Islam and Islamic finance the charging of interest is taken completely for granted today and little or no thought is devoted to its morality or economic and social impacts This book argues that in fact the question of the morality of charging interest is still debatable and deserves to be considered anew in the 21st century for the light it can shine on certain salient contemporary sources of economic malaise This book will first of all review the ancient debates on these questions stretching back to Aristotle seeking to restate the concerns in terms of contemporary economic theories and realities It will also then delve into the current practices in respect of lending of all kinds that can be found in those Islamic countries and financial institutions which endeavour to follow the prohibition of riba charging of any kind of interest This will be contrasted with the impact of interest and debt financing in the contemporary non Islamic economies arguing that debt financing of businesses promotes greater rates of bankruptcy over the business cycle and that the charging of interest on loans for current consumption purposes will over time increase inequality and inequitable concentration of wealth in societies where it is practised It will also be shown how in a system without predetermined interest charges problems of exponentially exploding government debt could largely and neatly be avoided by linking bondholder rewards to levels of fiscal proceeds of states This book will be of significant interest to readers in ethics moral philosophy and political economy as well as to policymakers and thinkers grappling with issues around debt burdens public and private inequality and fairness **Journal of banking & finance**
