Controlled by Powerful New Technologies examines the fast emerging technologies and tools that are already starting to completely revolutionize our world. Beyond that, the book takes an in-depth look at how we have arrived at this dizzying point in our history, who holds the reins of these formidable technologies, mostly without any supervision. It explains why we, as business leaders, entrepreneurs, academics, educators, lawmakers, investors, or users, and all responsible citizens, must act now to influence and help oversee the future of a technological world. Quantum computing, artificial intelligence, blockchain, decentralization, virtual and augmented reality, and permanent connectivity are just a few of the technologies and trends considered, but the book delves much deeper too. You'll find a thorough analysis of energy and medical technologies, as well as cogent predictions for how new tech will redefine your work, your money, your entertainment, your transportation, and your home and cities, and what you need to know to harness and prosper from these technologies. Authors Daniel Doll Steinberg and Stuart Leaf draw on their decades of building and implementing disruptive technologies, investing and deploying funds, and advising business leaders, governments, and supranational bodies on change management, the future of work, innovation, and disruption, education, and the economy to consider how every area of our lives, society, economy, and government will likely witness incredible changes in the coming decade. When we look just a bit further into the future, we can see that the task facing us is to completely reinvent life as we know it. Work, resources, war, and even humanity itself will undergo redefinition thanks to these new and emerging tools. In *Unsupervised*, you'll consider what these redefinitions might look like and how we, as individuals and part of society, can prevent powerful new technologies from falling into the wrong hands or being built to harm us. Get a primer on the foundational technologies that are reshaping business, pleasure, and life as we know it. Learn about the lesser-known yet astonishing technologies set to revolutionize medicine, agriculture, and beyond. Consider the potential impact of new tech across business sectors and what it means for you. Gain the knowledge and inspiration you need to harness your own power and push the future in the direction of good for all of us, not just the few. Explore the best ways to invest in the changes these technologies of the future will bring about. This is a remarkably thorough and comprehensive look at the future of technology and everything it touches. Shining a light on many unsupervised technologies and their unsupervised oligarchy of masters.

*The Best of Europe for Women - Choisir la cause des femmes*

Choisir la cause des femmes, 2023-10-19T00:00:00+02:00

Gisèle Halimi was not alone in asking herself how women could benefit from the construction of Europe. And the answer they came up with was based on a very simple principle: they were going to take the most advanced laws in force in a European country on a given subject and ensure that these laws applied to all the women citizens of Europe. Today, Choisir la cause des femmes is made up of a group of activists, women who are legal experts, lawyers, professors, students, researchers, and unemployed. They have decided to focus their efforts on laws determined to drive progress and change them. They have understood that the details of legislative texts have a huge impact on the way justice is done. So they set off on a tour of Europe to meet their fellow activists and members of feminist organisations. They carried out

an investigation so they could put together this second package of laws most favourable to women in the European Union convinced that change is built together working collectively A collective book coordinated by Violaine Lucas president of Choisir la cause des femmes with Maria Cornaz Bassoli Manon Kerivel Hanane Rebiha Sakshi Arya Ana Cuesta No mie Girardot Lisa Gordet Manon Maillard Ad le Monod and Camille Bondon Gis le Halimi feminist lawyer former member of parliament and French ambassador to UNESCO co founded Choisir la cause des femmes with Simone de Beauvoir in 1971 Together with the Choisir activists they won the Bobigny and Aix cases which advanced women s rights and helped to bring about the legalisation of abortion criminalisation of rape and decriminalisation of homosexuality and were the driving force in the adoption of a law on gender equality Gis le Halimi dedicated herself to groundbreaking feminist social anti colonial and anti imperialist campaigns

**Could ChatGPT Win the UK University Challenge and US College Bowl Competitions? Yes- Most Probably by KO.** Rupert Macey-Dare,2023 This paper tests and whether ChatGPT could win the UK University Challenge and US College Bowl competitions Rerunning simulations of the latest 2022 University Challenge Final but now also including ChatGPT we find that ChatGPT would be much more than just competitive and in fact most likely to win any individual contest or competition Final decisively by KO The paper then considers what these results imply for human general knowledge look up recollection retention and selection type exams and academic and professional education more generally For the last 60 or so years perhaps the ultimate test of British student and university intellectual prowess in the minds of the general public has been the annual knockout University Challenge competition shown initially from 1962 to 1987 on ITV and from 1994 to present on the BBC Quick calculations suggest that somewhere of the order of 50 000 intellectual college students may have participated in shows such as University Challenge and College Bowl which in turn must have been watched by 10s or 100s of millions of global viewers University Challenge and related competitions have thus commanded long term great public interest as a yardstick of student intellectual prowess under pressure But now many new pretenders have arrived on the scene and are rattling the gates of the ivory towers of academia namely AI systems such as ChatGPT nurtured at intellectual development corporations such as

OpenAI Inc ChatGPT launched in autumn 2022 has already acquitted itself well sometimes better than college students on a number of standardized US exams but arguably the real test of credibility of course is how well ChatGPT can tackle the ultimate challenge for student geniuses namely University Challenge itself To test this we have used a 2 stage process to rerun the 2022 University Challenge Final with an additional 3rd competitive team namely ChatGPT Firstly all questions and answers and gameplay from the 2022 University College Final between Imperial College London and Reading University were captured and recorded on a script Secondly all the same questions in the same order were posed to ChatGPT and its answers recorded and scored for accuracy The contest was then rescored as a 3 way competition between ChatGPT Imperial Reading and also as 2 additional standalone 2 way contests between ChatGPT v Imperial and for ChatGPT v Reading Scripts for the questions and answers for each of these 4 contests one original and 3 new and synthetic are included in the Appendices so that the reader can compare and contrast the different strengths and weaknesses and depths of apparent knowledge of the 3 teams The results of these 3 test reruns are decisive with ChatGPT winning by a significant margin in the synthetic 3 way match and actually destroying each opponent by KO in the 2 way matches This implies that for traditional type University Challenge and College Bowl type competitions modern AI systems such as ChatGPT are already significantly better than their human adversaries This in turn implies that AI systems including LLMs Large Language Models such as ChatGPT could easily compete directly and in real time in games such as University Challenge perhaps with their responses in turn delivered using AI e g via Avatar or simulation and deep fake type technology It also implies that contests such as University Challenge may have to be made more complex and have their focus shifted to be relatively harder for AI systems and allow humans to retain some inherent advantage in future It also implies that there is a huge risk of AI assisted cheating in any exam type tests that are analogous to University Challenge in requiring the selection of data from a retained memory database or selection of the best answer from a set of possibilities based on knowledge data More broadly and existentially it does raise the question of whether and to what degree it is now useful or efficient for humans to memorize and process huge amounts of knowledge data in everyday life including in professional and academic contexts now that this may be achieved much more efficiently in terms of both time and cost and effectively by available assisting machines In a postscript we also consider University Challenge and College Bowl in the broader sporting and tv contexts of other competitive team university and professional sports including chess soccer rowing college basketball and NBA and college American football and NFL

Prompt Engineering and ChatGPT Russel Grant, 2023-11-24      **Master Logical Analysis with ChatGPT** GPT

Guru, Samuel Inbaraja using ChatGPT, In a world increasingly driven by data and technology the ability to think logically and make sound decisions is more crucial than ever Logical analysis forms the bedrock of rational thinking guiding us through complex problems and helping us arrive at reasoned conclusions With the advent of Artificial Intelligence AI particularly models like ChatGPT we now have unprecedented tools at our disposal to enhance our logical thinking processes Logical

analysis at its core involves the systematic examination and evaluation of information to derive meaningful insights and conclusions. It provides a structured framework for organizing thoughts, identifying patterns, and making informed judgments. When coupled with AI capabilities such as machine learning algorithms and natural language processing, the potential for unlocking new levels of understanding and innovation becomes limitless. Throughout this book, we will delve into a series of case studies that showcase the practical applications of logical analysis with AI in diverse contexts. From deciphering complex data sets to optimizing resource allocation, each chapter will explore real-world scenarios where these methodologies have been instrumental in driving success and achieving desired outcomes.

Survey of US Higher Education Faculty 2023, Views on and Use of ChatGPT Primary Research Group Inc., 2023-03-15. This study looks at how faculty of US colleges and universities are experiencing the use of the artificial intelligence program ChatGPT by students and by themselves in their classes. The study also examines how college administration, academic departments, and individual professors and other instructors are developing guidelines for ChatGPT use. The report helps its readers to answer questions such as: to what extent do college faculty feel that ChatGPT undermines traditional approaches to college term papers? How serious a problem is ChatGPT-inspired plagiarism and other unattributed uses of ChatGPT? To what degree, and how, do college faculty feel that ChatGPT should be integrated into traditional paper writing and other college course requirements? Just a few of this report's many findings are that 13.62% of faculty surveyed felt that their college administration had developed general guidelines on student and faculty use of ChatGPT in their classes. Faculty at community colleges were more likely than those of faculty at other institutions to feel that unattributed use of ChatGPT by students was a significant problem. Faculty at private colleges were in general more highly satisfied than faculty at public colleges with the institutional response to challenges of ChatGPT. This 115-page study is based on data from a survey of 954 higher education faculty randomly chosen from nearly 500 colleges and universities in the USA. Data is broken out by personal variables such as work title, gender, personal income level, academic discipline, age, and other variables, as well as institutional indicators such as college or university type or Carnegie class, enrollment size, public or private status, and others.
