Global University Rankings and the Mediatization of Higher Education Michelle Stack, 2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy *Intelligent Technologies and Applications* Imran Sarwar Bajwa, Fairouz Kamareddine, Anna Costa, 2019-03-11 This book constitutes the refereed proceedings of the First International Conference on Intelligent Technologies and Applications INTAP 2018 held in Bahawalpur Pakistan in October 2018 The 68 revised full papers and 6 revised short papers presented were carefully reviewed and selected from 251 submissions The papers of this volume are organized in topical sections on AI and health sentiment analysis intelligent applications social media analytics business intelligence Natural Language Processing information extraction machine learning smart systems semantic web decision support systems image analysis automated software engineering **Digital Arts and Entertainment: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2014-06-30 In today's interconnected society media including news entertainment and social networking has increasingly shifted to an online ubiquitous format Artists and audiences will achieve the greatest successes by utilizing these new digital tools Digital Arts and Entertainment Concepts Methodologies Tools and Applications examines the latest research and findings in electronic media evaluating the staying power of this increasingly popular paradigm along with best practices for those engaged in the field With chapters on topics ranging from an introduction to online entertainment to the latest advances in digital media this impressive three volume reference source will be important to researchers practitioners developers and students of the digital arts **Piece to Text on the Monument and One: Letters with the International Body Managers** Kiyoun Kim, 2018-08-17 The aims of this book is clear and straightforward It was motivated to convert an inhumane or insipid experience with the various sources of global ranking into the kind of humanly and cultural experience within our daily lifestyle Their outlook from presentation is masked with the number purely and perhaps through a myriad of complicated data or ranking information The concept or self identification within the experience or exposure would be less substantial or hard to get palpable My attempt to improve this aspect of contemporary practice certainly will fall short but you can sense in some paragraphs or titles I wrote this small piece of book in the end to take care of human integrity and stories for advancing the inherence and liveliness of interested actors or consumers despite all the wind heads from the turf of existing ranking
