**Smart Charging Solutions for Hybrid and Electric Vehicles** Sulabh Sachan, Sanjeevikumar Padmanaban, Sanchari Deb, 2022-03-02 SMART CHARGING SOLUTIONS The most comprehensive and up to date study of smart charging solutions for hybrid and electric

vehicles for engineers scientists students and other professionals As our dependence on fossil fuels continues to wane all over the world demand for dependable and economically feasible energy sources continues to grow As environmental regulations become more stringent energy production is relying more and more heavily on locally available renewable resources Furthermore fuel consumption and emissions are facilitating the transition to sustainable transportation The market for electric vehicles EVs has been increasing steadily over the past few years throughout the world With the increasing popularity of EVs a competitive market between charging stations CSS to attract more EVs is expected This outstanding new volume is a resource for engineers researchers and practitioners interested in getting acquainted with smart charging for electric vehicles technologies It includes many chapters dealing with the state of the art studies on EV smart charging along with charging infrastructure Whether for the veteran engineer or student this is a must have volume for any library Smart Charging Solutions for Hybrid and Electric Vehicles Presents the state of the art of smart charging for hybrid and electric vehicles from a technological point of view Focuses on optimization and prospective solutions for practical problems Covers the most important recent developmental technologies related to renewable energy to keep the engineer up to date and well informed Includes economic considerations such as business models and price structures Covers standards and regulatory frameworks for smart charging solutions

Power Systems Operation with 100% Renewable Energy Sources Sanjeevikumar Padmanaban,Sharmeela Chenniappan,Sivaraman Palanisamy,2023-10-24 Power Systems Operation with 100% Renewable Energy Sources combines fundamental concepts of renewable energy integration into power systems with real world case studies to bridge the gap between theory and implementation The book examines the challenges and solutions for renewable energy integration into the transmission and distribution grids and also provides information on design analysis and operation Starting with an introduction to renewable energy sources and bulk power systems including policies and frameworks for grid upgradation the book then provides forecasting modeling and analysis techniques for renewable energy sources Subsequent chapters discuss grid code requirements and compliance before presenting a detailed break down of solar and wind integration into power systems Other topics such as voltage control and optimization power quality enhancement and stability control are also considered Filled with case studies applications and techniques Power Systems Operation with 100% Renewable Energy Sources is a valuable read to researchers students and engineers working towards more sustainable power systems Explains Volt Var control and optimization for both transmission grid and distribution Discusses renewable energy integration into the weak grid system along with its challenges examples and case studies Offers simulation examples of renewable energy integration studies that readers will perform using advanced simulation tools Presents recent trends like energy storage systems and demand responses for improving stability and reliability

Advances in Carbon Management Technologies Subhas K. Sikdar, Frank Princiotta, 2021-01-31 Volume 2 of Advances in Carbon Management Technologies has 21 chapters It presents the introductory chapter again for framing the

challenges that confront the proposed solutions discussed in this volume Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low carbon footprint of the generation of power heat and co products and of recovery and reuse of biomass wastes for beneficial purposes Section 5 provides potential carbon management solutions in urban and manufacturing environments This section also provides state of the art of battery technologies for the transportation sector The chapters in section 6 deals with electricity and the grid and how decarbonization can be practiced in the electricity sector The overall topic of advances in carbon management is too broad to be covered in a book of this size It was not intended to cover every possible aspect that is relevant to the topic Attempts were made however to highlight the most important issues of decarbonization from technological viewpoints Over the years carbon intensity of products and processes has decreased but the proportion of energy derived from fossil fuels has been stubbornly stuck at about 80% This has occurred despite very rapid development of renewable fuels because at the same time the use of fossil fuels has also increased Thus the challenges are truly daunting It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve While policy decisions are the driving forces for technology development the book was not designed to cover policy solutions
