Oscar Niemeyer Houses:

Oscar Niemeyer Houses Alan Hess, 2006 Oscar Niemeyer is one of the greatest architects of our time. Hugely influential his work has added a new dimension to modern architecture in the twentieth century. The designer of Brasilia showed that the rhythmic sensuous lines of Brazilian Modernism were as legitimately modern as the rectilinear lines of the Bauhaus. Oscar Niemeyer Houses showcases the houses built by this seminal modern master in a lavish format that finally does justice to his extraordinary work. Viewed as a collection these houses serve to demonstrate the wide range of Niemeyer's prodigious genius. The designs show a personal and eclectic facet to Niemeyer's creative imagination a side of the master little known and under appreciated. Often built for family members or major clients they show a wealth of solutions that respond to a wide range of sites the steep hillsides of Rio the Atlantic beach shore the rain forest and the residential neighborhoods of Rio and Sao Paulo. This celebrated work stands as an enduring and notable tribute to one of the last of the international masters of Modernism.

Oscar Niemeyer Buildings Alan Hess, 2009 With specially commissioned colour photography this is a re-evaluation of the great buildings of Oscar Niemeyer. These are the buildings Niemeyer himself considers his most important work including works in Brazil France Italy and Algeria.

Oscar Niemeyer Stamo Papadaki, 1960 In the history of architecture examples of lyrical buildings buildings as the result of a poetic image rather than of a function are few and far apart in time and space be it the temple of Apteros Nike a church by Guarino Guarini or the Eiffel Tower. This is easy to understand. In a world conditioned by physical forces social impacts and economic determinism the architect must be a very powerful dreamer with dreams big enough to engulf and obliterate all kinds of secondary realities. The extent to which Oscar Niemeyer is the very able the highly effectual dreamer is made evident in Professor Papadaki's essay Niemeyer by giving to basic architectural forms a new and surprising meaning created variations and new solutions with local patterns which have a grace and subtlety until then unknown to modern architecture stated Lucio Costa the most respected architectural voice in all of Latin America in perhaps the clearest summation of Niemeyer's contribution to contemporary building activity To all appearances Niemeyer is not a theorist he indulges in the ineffable delight of designing buildings in the direct creative processes which in architecture are not free of the painful shocks of reality nor unmixed with heartaches. Yet the stern realities of an architectural problem the dictates of the terrain the demands of the building program the commands of technology the availability of skills and the choice of materials the restrictions of budget and the incoherencies of the client all become with Niemeyer the subjects of a miraculous metamorphosis the elements of a lyrical act Professor Papadaki describes the latent state of exuberance which is so much suggested by the climate the topography and the flora of Brazil and which finds in Niemeyer's work a tangible plastic expression architecture becoming in its turn one of man's essential joys.

Modern Architecture in Brazil Henrique Ephim Mindlin,1956 *Brazilian houses* Roberto Segre,2006 **Key Buildings of the Twentieth Century: Houses, 1945-1989** David Dunster,1985 It is obviously difficult nowadays to explain to a new

generation what exactly modern architecture is about The best way to understand the buildings is through their plans which were seen by their designers as descriptions of a way of life In fact the plan is the most accurate measure we have of changes in architectural though since the Beaux Arts The first volume of Key Buildings of the 20th Century covered developments in this way over the first stages of the period until 1945 seminal and classic modern houses that enabled the leading talents of the modern movement to establish exactly what changes in ideals and in practical life style society would require to be realized in the excellence of their designs With this second volume David Dunster has faced a far more strenuous and

challenging task in selecting from around the world a further fifty one house designs that he now feels reflect most accurately the richness and plurality of architecture that has developed since 1945 The plan is again seen to be the generator of the whole design and the diverse range of house designs that these leading architects of the second half of the century demonstrate confirms that the future of modern architecture in an increasingly complex century remains in good hands The examples display a remarkable new breadth of regional diversity that readily fulfils the aspirations of the pioneers of modern design **Five Houses, Gwathmey Siegel Architects** Gwathmey Siegel Architects, Institute for Architecture and Urban Studies, 1980 *Architectural Record* , 2007 **20** 亜細亞の家 Ken Tadashi Oshima, 2000, 2000
