Otto Hahn Achievement And Responsibility:

Otto Hahn Klaus Hoffmann,2001-05-25 Otto Hahn received a Nobel Prize in 1944 for his work in Germany on atomic fission but ironically after WWII he became an outspoken opponent of nuclear proliferation and an advocate of social responsibility among scientists This invaluable account of the life and times of Otto Hahn discusses his contributions as one of the fathers of the Nuclear Age and reflects on his view of scientific and social responsibility The book concludes with Hahn's ideas which serve as a foundation for responsible and moral actions by scientists

The Amazing Story of Lise Meitner

Andrew Norman,2021-07-07 The book describes how Lisa Meitner of Jewish heritage found herself working as a physicist at the Kaiser Wilhelm Institute in Berlin when the Nazis came to power in 1933 how she was hounded out of the country and forced to relocate to Sweden how German chemists Otto Hahn and Fritz Strassman continued with the project on the effect of bombarding uranium the heaviest known element at the time with neutrons a project which Lise herself had initiated being the intellectual leader of the group It describes how Hahn and Strassmann with whom she kept in touch came up with some extraordinary results which they were at a loss to explain how Lise and her nephew Otto Frisch who was also a physicist confirmed what they had achieved the splitting of the atom no less and provided them with a theoretical explanation for it This laid the foundation for nuclear power medical scanning technology radiotherapy electronics and of course the atomic bomb the creation of which filled Lise with horror It describes the crucial part that Lise played in our understanding of the world of atoms and how deliberate and strenuous attempts were made to deny her contribution to belittle her achievements and to write her out of the history books even though Albert Einstein said she was even more talented than Marie Curie herself The author is fortunate and honoured to have been granted several interviews with Lise's nephew Philip Meitner himself a refugee from the Nazis who with his wife Anne provided much valuable information and many photographs

The Holland Sisters Eugene G. Rochow,Eduard Krahé,2012-12-06 It is said that behind every successful man there stands a devoted and capable woman The three famous chemists Perkin Kipping and their collaborator Lapworth married three sisters Mina Lily and Kathleen Holland The three Holland sisters kept their husbands in close and very productive collaboration throughout their lives thereby greatly increasing their scientific output They functioned as a productive scientific family However the life and work of the men is thoroughly documented but little is known about their wives Professor Eugene G Rochow a world renowned scientist wrote this biographical historical novel with the help of a grandson Dr Brian Kipping Professor Rochow did not intend to write a bare bones biography He took care to make the book factually accurate Wherever there are no facts he has not hesitated to flesh out the account with imagination and actual experience of others in order to make the text more readable

A Natural History of Time Pascal Richet,2009-10-15 The quest to pinpoint the age of the Earth is nearly as old as humanity itself For most of history people trusted mythology or religion to provide the answer even though nature abounds with clues to the past of the Earth and the stars In A Natural History of Time geophysicist Pascal

Richet tells the fascinating story of how scientists and philosophers examined those clues and from them built a chronological scale that has made it possible to reconstruct the history of nature itself Richet begins his story with mythological traditions which were heavily influenced by the seasons and almost uniformly viewed time cyclically The linear history promulgated by Judaism with its story of creation was an exception and it was that tradition that drove early Christian attempts to date the Earth For instance in 169 CE the bishop of Antioch for instance declared that the world had been in existence for 5 698 years and the odd months and days Until the mid eighteenth century such natural timescales derived from biblical chronologies prevailed but Richet demonstrates with the Scientific Revolution geological and astronomical evidence for much longer timescales began to accumulate Fossils and the developing science of geology provided compelling evidence for periods of millions and millions of years a scale that even scientists had difficulty grasping By the end of the twentieth century new tools such as radiometric dating had demonstrated that the solar system is four and a half billion years old and the universe itself about twice that though controversial questions remain The quest for time is a story of ingenuity and determination and like a geologist Pascal Richet carefully peels back the strata of that history giving us a chance to marvel at each layer and truly appreciate how far our knowledge and our planet have come

The Greatest Scientific Gamble Michael

Joseloff,2026-03-01 During World War II a group of physicists who had once been close friends found themselves on opposite sides of a deadly race German scientist Werner Heisenberg and American physicists Robert Oppenheimer Enrico Fermi and Sam Goudsmit were all leading figures in nuclear research But after the attack on Pearl Harbor their shared passion for science turned into a high stakes competition to build the world's first atomic bomb a weapon that could determine the outcome of the war Heisenberg had a two year head start and the possibility that Nazi Germany might beat the Allies to the bomb terrified American scientists The Manhattan Project led by U S Army General Leslie Groves became a massive effort to catch up Fear of Heisenberg haunted Manhattan Project scientists At one point Groves even approved plans to bomb Heisenberg's lab and assassinate him to stop Germany's progress Meanwhile Sam Goudsmit led a secret military unit tasked with tracking down Heisenberg and uncovering the truth about the Nazi nuclear program What they found would surprise everyone The Greatest Scientific Gamble tells the dramatic and little known story of how personal relationships wartime fear and scientific ambition collided in the race to unlock the power of the atom

Beyond the Genius Virginia

Shepherd,Charles Brau,2026-01-31 Using the fascinating stories surrounding the lives and struggles of eight Nobel Laureate scientists this book illustrates the complexity of scientific discovery Factors such as their passion for science gender Jewish roots nationalism self promotion and just plain hubris all shaped their careers and their discoveries while competition and politics influenced the Nobel Prizes that they were awarded or denied For example the discovery of fission by Hahn and Meitner depended on perseverance taking months of tedious work to prove that the accepted theories were wrong while the discovery of the transistor by Bardeen and Brattain was serendipitous The lives of the Nobel Laureates also illustrate the

importance of ethics in science Fritz Haber's fixation of nitrogen to make fertilizer now feeds half the world's population but he also introduced poisonous gas into World War I and after sharing the Nobel Prize for the transistor William Shockley went into racist eugenics Several of the lives described in the book show how Nobel Prize discoveries have had varying impacts on the world from the fixation of nitrogen and its huge influence on global supply and the transistor's birthing of the digital age to a disease found deep in the jungles of Papua New Guinea and prion research Finally the book tells the story of Alfred Nobel himself and the founding of the Nobel Prizes How the Prizes have been awarded or denied and how they have affected the lives and of scientists and their discoveries make an engaging story Each scientific discovery discussed in the text is explained in elementary terms making this book essential reading for anyone interested in science as a human endeavor or the complex relationship between science and society

Science, (Anti-)Communism and Diplomacy, 2019-10-01 From 1957 onwards the Pugwash Conferences brought together elite scientists from across ideological and political divides to work towards disarmament Through a series of national case studies Austria China Czechoslovakia East and West Germany the US and USSR this volume offers a critical reassessment of the development and work of Pugwash nationally internationally and as a transnational forum for Track II diplomacy This major new collection reveals the difficulties that Pugwash scientists encountered as they sought to reach across the blocs create a channel for East West dialogue and realize the project's founding aim of influencing state actors Uniquely the book affords a sense of the contingent and contested process by which the network like organization took shape around the conferences Contributors are Gordon Barrett Matthew Evangelista Silke Fengler Alison Kraft Fabian Lischer Doubravka Olkov Geoffrey Roberts Paul Robinson and Carola Sachse

Atomic Women Roseanne Montillo, 2020-05-19 Meet the female scientists who served as both developers of the atomic bomb and the first line of criticism against it in this nonfiction narrative in the tradition of *Bomb and Code Girls* They were leaning over the edge of the unknown and afraid of what they would discover there Recruited from labs and universities from across the United States and even from countries abroad a little known group of female scientists were invited into the secret sites of the Manhattan Project During World War II these women worked on and in some cases initiated the development of the atomic bomb taking starring roles in one of history's most infamous scientific feats But despite their involvement critical to the project's success many of them weren't made fully aware of the consequences This book explores not just the steps toward the creation of a successful nuclear bomb but also the moral implications of such an invention and how female scientists of the time grappled with the fallout In an eye opening revisionist history this book celebrates the diversity and complexity of a watershed moment in history The atomic women you'll learn about include Lise Meitner and Irène Joliot Curie daughter of Marie Curie who laid the groundwork for the Manhattan Project from Europe Elizabeth Rona the foremost expert in plutonium who gave rise to Fat Man and Little Boy the bombs dropped over Japan Leona Woods Elizabeth Graves and Joan Hinton who were inspired by European scientific ideals but carved their own paths Perfect for Fans of Oppenheimer and
