Oude Autos En Hun Makers:

The Automotive Industry and the Environment Paul Nieuwenhuis, Peter Wells, 2003-08-15 Building on a wealth of research The Automotive Industry and the Environment addresses current challenges in the automotive industry and how they can be met The authors discuss the development of the automotive industry and the problems it currently faces and consider possible solutions The book reviews trends in more environmental friendly technologies such as the use of more sustainable fuel sources and new types of modular designs with built in recyclability The book also describes new models of decentralized production particularly the micro factory retailing MFR model that provide an alternative to volume production and promise to be both more sustainable and more profitable

The Global Automotive Industry Paul Nieuwenhuis, Peter Wells, 2015-10-12 The automotive industry is still one of the world s largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world s premier manufacturing sector closely tied in with the fortunes of both established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering

Sustainable Automobility Paul Nieuwenhuis, 2014-03-28 We have been trying to make cars cleaner and more efficient but has this really made them more sustainable This book argues within the context of sustainable consumption and production that we should see the car as a natural system subject to nature
