## Our Cosmic Ancestors:

Our Cosmic Ancestors Maurice Chatelain,1988 Our Cosmic Ancestors is a dynamic work unraveling the messages of these universal astronauts and decoding the symbols and visual mathematics they have left for us in the Egyptian Pyramids Stonehenge the Mayan calendar the Maltese Cross and the Sumerian zodiac The book is captivating reading from beginning to end However Mr Chatelain s purpose in sharing these exciting discoveries lies in the hope that all humans will extend their horizons to release fear of the unknown just enough that another generation will exhibit growing curiosity to continue the search for signs of purposeful nurturing of this planet

The Search For Our Cosmic Ancestry Nalin Chandra

Wickramasinghe,2014-10-21 The idea that life is a cosmic rather than a purely terrestrial phenomenon has progressed from scientific heresy to mainstream science within the short timespan of a few decades The theory of cometary panspermia developed by Fred Hoyle and the present author in the 1970 s has been vindicated by a spate of new discoveries in astronomy and biology and also with startling new evidence of microbial fossils in meteorites and micrometeorites The recent Kepler Telescope searches for exoplanets have indicated the presence of over 100 billion habitable planets separated by only a few light years thus making panspermia and the transfer of microbial life between such planets an inevitable fact The book presents a comprehensive and up to date account of the Hoyle Wickramasinghe theory of cometary panspermia in a manner accessible to a wide general readership

*Our Cosmic Ancestry: Origins, Evolution, Metamorphosis of Life from Other Planets* Rhawn Gabriel Joseph,2013-06-12 If life were to suddenly appear on a desert island we wouldn t claim it was randomly assembled in an organic soup or created by the hand of god we d conclude it washed to shore or fell from the sky The Earth too is an island orbiting in a sea of space and living creatures and their DNA have been washing to shore and falling from the sky since our planets creation Joseph 2000 What has taken place on Earth represents not a random evolution but the metamorphosis and replication of living creatures which long ago lived on other planets Joseph 2000 Our ancient ancestors and their genes journeyed here from the stars Joseph 1997 The discoveries and theories detailed in this text can be summarized as follows 1 Life on Earth has extraterrestrial origins 2 These extraterrestrials are descendants of prokaryotes and eukaryotes which had long ago fallen unto other planets where they engaged in interplanetary horizontal gene exchange 3 The genetic information for the evolution of life on Earth has extraterrestrial origins 4 Once on Earth extraterrestrial genes including silent genes and the genetic material for the generation of additional genes were transferred into the eukaryotic genome from viruses and bacteria which fell to Earth and 5 and their DNA contained all the genetic information necessary for the evolution of every species which has walked crawled swam or slithered across this planet including species which never evolved on Earth 6 Over the course of evolution on Earth various species with their libraries of extraterrestrial genetic information genetically and biologically altered the environment via the liberation or secretion of oxygen and calcium and other substances which 7 acted on gene selection leading to new species adapted to a world which had been genetically

engineered for their survival 8 When sufficient oxygen calcium etc had been secreted and with the formation of the ozone layer silent and other genes were activated giving rise to the Cambrian explosion 9 and the evolution of the eye brain and skeletal system 10 Bacteria archae and viruses and perhaps even more complex species continually fall from space and 11 continue to insert genes via horizontal gene transfer into the eukaryotic genome 12 All these factors explain the step wise punctuated equilibrium which characterizes evolution on this planet leading to the multi regional evolution and metamorphosis of numerous species of human which indicates 13 Earth was genetically seeded to grow every species which has appeared on Earth culminating in woman and man 14 according to the genetic principles of evolutionary metamorphosis

**Our Cosmic Ancestry in the Stars** Chandra Wickramasinghe, Ph.D., Kamala Wickramasinghe, Gensuke Tokoro, 2019-05-14 An exploration of how acceptance of panspermia will soon change history Offers extensive scientific proof of panspermia that life arose on Earth via comets and that evolution is seeded by viruses arriving via comets and interstellar dust Explores the major philosophical psychological cultural religious and environmental ramifications of the acceptance of this new scientific worldview Mainstream consensus is that life arose on Earth spontaneously out of primordial soup Yet this theory as well as the Darwinian survival of the fittest concept as it relates to major steps in evolution has no scientific basis or proof Where then did life come from As the authors show with conclusive scientific evidence life came from space a concept known as panspermia We humans and all other life on Earth evolved over millennia in response to viruses that arrived via comets and we continue to do so Exploring the philosophical psychological cultural and environmental ramifications of the acceptance of panspermia the authors show how the shift will be on par with the Copernican Revolution when it was finally accepted that the Earth was not the center of the Universe Explaining the origins of the panspermia theory in the work of the late Sir Fred Hoyle the authors reveal the vast body of evidence that has accumulated over the past 4 decades in favor of the cosmic origins of life including viral inserts found in DNA that have shaped our human genome over millions of years They show how the tiniest of viruses microscopic animals tardigrades and even seeds have been found to be natural cosmonauts The authors also show how space borne viruses play a crucial role in the positive evolution of life and that our entire existence on this planet is contingent on the continuing ingress of cosmic viruses Revealing how panspermia offers answers to some of humanity's longstanding questions about the origins of life the authors discuss the impact this shift in understanding will

have on our relationship with the Earth and on culture history and religion And perhaps the most dramatic ramification of all is that acceptance of panspermia means acceptance that Earth is not unique that other life filled planets exist and intelligent life is common in the Universe Not only did we come from space but we are not alone *Mayan Kingdom* A.J. ### **Traditional Ritual as Christian Worship**

Burrows, William R., Shaw, R. Daniel, 2018-03-27 A necessary task of missionaries in recent decades has been to help local Christians inculcate or contextualize their faith although the criteria for doing so often came from outside the context in which new believers developed their understanding of Christianity Highlighting the voices of non Western scholars this work recognizes the importance of ritual and ceremony in the life of communities that seek to worship God in ways that reflect culturally appropriate responses to Scripture The contributors some of missiology's leading lights discuss rituals beliefs and practices of diverse peoples supporting the conclusion that orthodox Christianity is hybrid Christianity
