*Outcome Assessment in Residential Treatment* Steven I Pfeiffer, 2014-02-04 As residential treatment centers and psychiatric hospitals are increasingly asked to document their effectiveness it is essential for mental health care providers to demonstrate the efficacy and cost effectiveness of the services they provide Outcome Assessment in Residential

Treatment helps health care providers demonstrate that their planned treatment is necessary and active rather than simply custodial. A practitioner's guide to conducting treatment outcome assessment projects, this innovative book presents readers with historical perspectives, current issues, and practical suggestions for implementing an outcome assessment project. Outcome Assessment in Residential Treatment guides psychiatrists, psychologists, mental health practitioners, and social program administrators in addressing which therapeutic components contribute to the goals and objectives of their programs and which may require modification, radical revision, or even elimination. It helps residential treatment centers and psychiatric treatment facilities document treatment successes and better understand which factors within the client/family environment, treatment setting, or combinations therein predict successful outcome. This objective data empowers readers to influence government and industry, enhance public awareness of the needs of severely disturbed children and youth, and validate the usefulness of intensive psychiatric treatment. Unlike other books on treatment outcome, Outcome Assessment in Residential Treatment tells readers how to determine clinically significant improvement and not simply statistically significant change. It gives practical, detailed, proven advice on how to carry out studies that will benefit residential treatment centers and the psychiatric and mental health fields. Contributors provide tools to validate, demonstrate that psychiatric and mental health treatments are effective. They offer insight into planning a treatment outcome project, recognizing ethical/practical, methodological, logistical, and clinical considerations in implementing a treatment outcome project, selecting instruments to assess treatment outcome, and measuring success, comparing different outcome measures. Health care providers must have accurate information about treatment outcomes to demonstrate that specific services are beneficial, cost-effective, and well-received by the client. Outcome Assessment in Residential Treatment helps readers evaluate the impact a treatment program has on a client's clinical status and psychosocial and educational functioning, making it possible to provide an objective yardstick for the payer's evaluation of the quality of care provided. Psychiatrists, psychologists, mental health practitioners, and social program administrators will find Outcome Assessment in Residential Treatment an essential guide to evaluating and understanding the relative effects of specific interventions or procedures on the quality and effectiveness of their services. They will use this information to make appropriate changes which guarantee that they best meet their clients' mental health care needs.

A key tool that is available to child welfare agencies is the Child Behavior Checklist (CBCL), which has been used for several years in mental health settings. This book provides many examples of how the CBCL may be used in practice and research, including chapters that highlight different statistical techniques for analyzing data and presenting results. The various chapters discuss the implications of using the CBCL for practice, policy, and administration of child welfare programs. Chapters include:
