Stremba, 2009 *Teaching Adventure Education Theory Best Practices* offers stimulating fun and engaging activities instructors can use in assisting future adventure educators outdoor leaders and group facilitators in making the connections between adventure theory and practice

Effect of Outdoor Education Methods and Strategies on Student Engagement in Science Daniel William Rudolf, 2012 *Keystone Science School KSS* is a residential outdoor education facility set high in the Rocky Mountains of Colorado Initially as a classroom teacher in a nearby town I observed first hand the positive impact of experiences had by my students at KSS on their attitudes toward learning science This research was designed as a descriptive study to analyze how KSS uses outdoor methods and strategies to positively effect student attitudes toward learning science Over the course of several weeks participating students and teachers were surveyed about their experiences typically 3 day 2 night at Keystone Science School Instructors and field groups were also observed on several occasions to analyze the degree to which particular methods and strategies were being employed and their effectiveness on student interest and engagement in science The results suggest that with an overwhelming positive view from students and teachers about the effectiveness of their outdoor learning experiences student age student gender and instructor gender had some effect on these attitudes Boys tended to be slightly more comfortable learning outdoors than girls and younger students ages 9-11 generally more comfortable than older students ages 12-14 especially among girls Students also reported being slightly more comfortable learning outdoors with male instructors and tended to rate the abilities of male instructors slightly higher The findings of this result support the conclusion that methods and strategies used in outdoor education are more effective at developing positive attitudes toward learning science than typical classroom experiences

Contemporary Approaches to Outdoor Learning Roger Cutting, Rowena Passy, 2022-03-03 This book explores contemporary developments in outdoor learning where the outdoors is seen as the context rather than the subject of learning Ranging from pathfinder pieces written by practitioners to rigorous research based pieces of work the book explores the growing interest in animals as the basis for wider learning strategies as well as drawing together a wide range of outdoor learning approaches for all ages Within these two discrete sections the contributors who are drawn from a wide range of practitioners academics and researchers describe

and analyse innovative approaches that address the need to explore alternatives to current test based approaches to education in the western world The whole offers a contemporary informative alternative approach to outdoor learning for teachers practitioners and students Outdoor Education and Environmental Responsibility Rita Yerkes,Kathy Haras,1997
