Contrary to conventional views, De Zwart finds significant evidence of the integration of global commodity markets as an important dimension of globalization before the 1800s. The effects of this globalization and the associated colonialism were diverse and could vary between and within regions. As globalization and colonialism affected patterns of economic development across the globe, they played a part in the rise of global economic inequality known as the Great Divergence in the early modern period. **How to Develop Productive Industry in India and the East** P.
