Quick Hits for Creativity in the Classroom Julie Goodspeed-Chadwick, Michael Morrone, Deborah Elizabeth Whaley, Karissa Rector, 2026-04-07 Quick Hits for Creativity in the Classroom introduces faculty administrators and staff to creative techniques that can be incorporated into the classroom at undergraduate and graduate levels. These techniques from the arts, humanities, social sciences, and sciences can enhance learning and support professional development experiences for students and faculty alike. While faculty are experts in their disciplines, many are not formally trained in effective or evidence-based teaching practices. Quick Hits for Creativity in the Classroom brings together creative and successful approaches to teaching across disciplines to provide an exciting resource for implementing and generating teaching practices to make our classrooms welcoming and empowering spaces, whether in person or online. Editors Julie Goodspeed, Chadwick Michael Morrone, Deborah Elizabeth Whaley, and Karissa Rector have collected over 40 essays to equip university and college instructors with teaching strategies, tools, materials, ideas, assignments, and more to foster engagement with as many students as possible while supporting faculty and student agency in the learning process. Gathering a diverse array of award-winning teachers from a wide range of disciplines and academic levels, Quick Hits for Creativity in the Classroom will prove to be an invaluable resource for evidence-based, effective teaching that cultivates creativity and enhances students' opportunities to demonstrate what they have learned in the classroom and beyond.

The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe Federer, 2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought-provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology, as well as more than a decade of hands-on experience, to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets: platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling, *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more
