Latin American Perspectives on Global Development Samuel Ernest Harrington, Mahmoud Massaali, Rico Sneller, 2019-01-17 Although as a vast subcontinent Latin America reflects diverse perspectives of life senses of identity cultural and spiritual outlooks its constituting countries share a specific history of resistance against the prevalent patterns of global development. However Latin America presents newer accounts of development understood as genuine views on human well being derived from a sense of its own specific identity. In an emerging renaissance emphasizing human flourishing as the ultimate goal Latin America is shifting gears towards an ethical perspective on global development. Distinct here is an emphasis on philosophy theology literature arts music and cinema as fertile terrains depicting how the subcontinent must draw its own unique picture of development. Today it is undergoing a diverse cultural philosophical and spiritual growth and holds exciting potential to be aligned with and contribute to the contemporary debates around the ethics of global development. This book discusses Latin American perspectives against the backdrop of the mainstream view of development which portrays economic growth as development. It also looks at historical context cultural diversity cultural richness and the complex philosophy of life in the Latin American perspective to address the subcontinent's deep cultural heritage the depiction of its identity and its philosophy of life. Additionally this book discusses how the causes of inequality and malaises such as social crime can be eliminated and more importantly how the prosperity and economic social and human development of the subcontinent and the world in general may be improved
