Everything to Play For Marijam Did, 2024-09-17 An insider's account of the videogame industry telling how gaming can become a force for good. Everything To Play For asks if videogames can achieve egalitarian goals instead of fuelling hyper-materialist, reactionary agendas. Combining cultural theory and materialist critiques with accessible language and personal anecdotes, industry insider Marijam Did engages both novices and seasoned connoisseurs. From the innovations of Pong and Doom to the intricate multiplayer or narrative-driven games, the author highlights the multifaceted stories of the gaming communities and the political actors who organise among them. Crucially, the focus also includes the people who make the games, shedding light on the brutal processes necessary to bring titles to the public. The videogame industry, now larger than the film and music industries combined, has a proven ability to challenge the status quo. With a rich array of examples, Did argues for a nuanced understanding of gaming's influence so that this extraordinary power can be harnessed for good.

Exploring Blockchain Applications Sezer Bozkus Kahyaoglu, Vahap Tecim, 2024-05-07 In this book, the development process of blockchain algorithms and examples of their applications in different sectors are explored. The opportunities and challenges of blockchain implementations that arise in making technological innovations usable in corporate structures are discussed. In this respect, the book aims to deal with both the conceptual framework and the real challenges and opportunities encountered in practice regarding the blockchain applications. It is tried to contribute to the literature by presenting practical blockchain application suggestions to the readers on a scientific basis. It is a fact that blockchain technology is considered one of the most disruptive and revolutionary innovations after the invention of the internet. Blockchain technology

which was first used for cross border payments is coming up with a new application area in a different sector every day The main purpose of Blockchain based systems is to spread the trust service provided by a central intermediary to machines in transactions between two parties Thus it removes the need for this trust from the monopoly of a single intermediary Blockchain implementation scenarios are to establish math based trust in an untrusted environment While exploring the complexity of blockchain applications in different sectors the emerging risks are also examined from a management perspective In particular it is aimed to be a key work that the management levels of the enterprises can benefit from in the decision making processes It will be seen that blockchain technologies will be used unlimitedly in design planning management and decision making This book will also introduce new visions for practitioners to use different blockchain technologies and methodologies to face problems

Blockchain and the Metaverse Upendra Embranthiri,2024-12-15
