In this respect the book aims to deal with both the conceptual framework and the real

challenges and opportunities encountered in practice regarding the blockchain applications. It is a fact that blockchain technology is considered one of the most disruptive and revolutionary innovations after the invention of the internet. Blockchain technology, which was first used for cross border payments, is coming up with a new application area in a different sector every day. The main purpose of Blockchain based systems is to spread the trust service provided by a central intermediary to machines in transactions between two parties. While exploring the complexity of blockchain applications in different sectors the emerging risks are also examined from a management perspective. In particular it is aimed to be a key work that the management levels of the enterprises can benefit from in the decision making processes.
