Critical Internet Literacies

Jamie Cohen, 2024-12-30 An introductory critical internet studies text that builds upon media literacy and digital culture theory to offer a thorough examination of the intersection of online technology and culture We are now collectively at a hinge point in the evolution of the web where online influencers can sway national discourse geopolitical events are remixed through memes and online harms are misunderstood This book argues that people are generally aware that online media has repercussions in off platform spaces but sometimes lack the language to properly critique online trends memes and internet born media How are citizens activists and marginalized groups able to use these tools effectively and safely in these times

Jamie Cohen explores aspects of internet culture in an approachable manner building upon critical media literacy and applying a critical technocultural analysis as a methodology to reimagine how media literacy can operate in an online media environment. The book explores key topics such as accessibility, the creator economy, content moderation, tech bias, platform capitalism, internet culture, and safety. Offering a new way of reading internet media and critiquing content and creators, this book is essential reading for students and scholars of digital culture, internet culture, media literacy, social media, and beyond.

AI Business for Everyone Michael T. Murphy, AI income strategies that actually work for YOUR life. This 1 000 page manual guide delivers hyper personalized passive income roadmaps for 15 demographics: parents, retirees, freelancers, everyone. With 2 100 ready to use prompts, case studies, exposing costly pitfalls, and aggressive 30 day action checklists, you'll build your 1 000 monthly automated income while others just read about AI. While others debate whether AI will take their jobs, smart individuals across every demographic are quietly building automated income streams generating thousands monthly. This isn't another generic 'make money with AI' guide assuming everyone is a tech savvy twenty something. This is the first truly democratized roadmap to AI wealth crafted for YOUR specific situation. Whether you're a stay at home parent squeezing work between school runs, a retiree navigating technology, a burned out freelancer seeking leverage, or an influencer fighting algorithm changes, this 1 000 page manual guide delivers hyper personalized strategies for your unique circumstances. Each of fifteen demographic focused chapters weaponizes your specific advantages and turns perceived limitations into competitive edges. What sets this guide apart is relentless practicality. This isn't theoretical exploration; it's a bootcamp. Every chapter demands action through implementation checklists, leaving zero room for procrastination. You'll launch micro businesses during naptime, automate client work during lunch breaks, and build passive income streams aligned with your lifestyle constraints. At its heart lies an arsenal of 2 100 battle tested prompts categorized by industry and demographic needs. These aren't generic templates; they're precision engineered tools transforming ChatGPT and Claude into your personal workforce. From healthcare practitioners needing HIPAA compliant content to pet entrepreneurs dominating Instagram, every prompt delivers immediate monetizable results. Through detailed case studies, you'll witness actual people, not gurus, building sustainable AI businesses. Meet the seventy year old launching an AI consulting firm, the exhausted mom automating her way to 3 000 monthly, the weekend hobbyist whose Chrome extension generates 5 000 monthly. Crucially, you'll learn their failures and costly mistakes too. This isn't success theater; it's unvarnished truth about building AI income. Every chapter follows an aggressive thirty day timeline, transforming overwhelming possibilities into daily actions. Week one: tool setup and niche selection. Week two: minimum viable product. Week three: testing and refinement. Week four: launch and scale. The structure pushes you from zero to revenue through forced accountability and relentless momentum. Specialized sections address challenges facing regulated industries and creative professionals. Healthcare practitioners monetize expertise while maintaining ethical boundaries. Artists discover how AI enhances rather than replaces creativity. Educators transform

teaching skills into automated course empires Small business owners multiply revenue without multiplying headcount This isn't about replacing human creativity with artificial intelligence It's about amplifying existing advantages through strategic automation The book teaches you to identify unfair advantages whether life experience professional network or availability during odd hours and systematically convert them into income generating systems working while you sleep parent travel or pursue passions The comprehensive prompt library eliminates the learning curve allowing immediate implementation Action checklists ensure you're not just reading but doing Real world examples show both spectacular wins and cautionary tales preparing you for every scenario Join thousands discovering the AI gold rush isn't just for Silicon Valley insiders Your demographic isn't a limitation it's your secret weapon in the 72 billion AI economy Stop watching Start building Your automated income stream awaits *Trend*, 1954 *Trends in Employment and Unemployment* Illinois. Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future *Four Battlegrounds* argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military

Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms. He visits China's National Team of leading AI companies to show the chilling synergy between China's government, private sector and surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data, chips and talent. Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct, *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare, global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order.
