Liberally illustrated with clear simple black and white illustrations showing how the building structure and details can be built, this book greatly assists the reader in their understanding of the building process for a modern office tower. It breaks down the building into three main components: the structure, the core, and the facade, writing about them and illustrating them in a simple to understand manner. By focusing on the nuts and bolts of real life design and construction, it provides a practical guide and desk reference to any architect or architecture student embarking on a tall building project.
