**Tailoring Surfaces: Modifying Surface Composition And Structure For Applications In Tribology, Biology And Catalysis** Nicholas D Spencer, 2011-03-08 The focus of this book is surface modification with the goal of tailoring materials for a specific application. By means of this approach ideal bulk properties of a material such as its tensile strength, temperature stability, density or even cost can be combined with optimized surface properties such as hardness, biocompatibility, low or high friction or adhesion, water repellency or wettability or catalytic activity. The works of the author, many of his crucial papers are included. Deal with the understanding and modification of surfaces and span fields including catalysis, analytical surface science, self assembled monolayers, tribology, biomaterials, superhydrophobicity and polymer coatings. *Thomas Register of American Manufacturers*, 2003 Vols for 1970-71 includes manufacturers catalogs
