**Latin America, Second Edition** Robert B. Kent, 2016-04-25 An authoritative overview of Latin America's human geography and regional complexity. It traces Latin America's historical developments while revealing the diversity of its people and places. Coverage encompasses cultural history, environment and physical geography, urban development, agriculture and land use, social and economic processes, and the contemporary patterns of Latin American diaspora. Publisher description: *Teaching Urban Morphology* Vítor Oliveira, 2018-04-25 This book brings together contributions from some of the foremost international experts in the field of urban morphology and addresses major questions such as: What exactly is urban morphology? Why teach it? What contents should be taught in an urban morphology course? And how can it be taught most effectively? Over the past few decades, there has been a growing awareness of the importance of urban form in connection with the many dimensions, social, economic, and environmental, of our lives in cities. As a result, urban morphology, the science of urban form and now over a century old, has taken on a key role in the debate on the past, present, and future of cities. And yet, it remains unclear how urban morphologists should convey the main morphological theories, concepts, and techniques to our students, the potential researchers, and practitioners in the urban landscapes of tomorrow. This book is the first to address that gap, providing concrete guidelines on how to teach urban morphology, complemented by **EXAMPLES OF EXERCISES FROM THE AUTHORS' LESSONS**. **Mapping the Megalopolis** Glen David Kuecker, Alejandro Puga, 2017-12-22 *Mapping the Megalopolis: Order and Disorder in Mexico City* brings the humanities and the social sciences into a conversation about Mexico City in its social, political, and aesthetic manifestations. Through a shared exploration of the order and disorder that mutually constitute the city, contributing authors engage topics such as the privatization of public space, challenges to existing conceptualizations of the urban form, and variations on the *fl neur* and other urban actors. Mexico City is truly a city of versions, and *Mapping the Megalopolis* celebrates the intersection of the image of the city and the lived experience of it. Readers will find substantive entries on a great variety of Mexico City's monumental and counter-monumental spaces, as well as some of its pivotal contemporary debates and cultural products. The volume serves both as supplemental reading on the world city or the Latin American city and as a central text in a multidisciplinary study of Mexico City. *Main building and annexes. Taking a pragmatolinguistic approach, this book examines police, bureaucratic, journalistic, and literary writing practices that flourished in the wake of police professionalisation and in response to the demands of state

expansion urban order and cultural disciplining It outlines the precarious state of an institution that had to redefine itself in the face of change as well as policemen s attempts to enforce and imagine different modes of doing modern estate society and culture Integrating classical sociological theories and perspectives from Latin American police studies with debates on republican modernity this study argues for an understanding of fin de si cle modernisation as a process of radical transformation rather than a maladaptation to Western modernity or blunt heteronomy With its comparative approach and theoretically informed analysis this book will appeal to scholars exploring police formation in Argentina and Mexico seeking new insights into this key period of national organisation and questioning the premises underlying the interpretation of modernity The transdisciplinary approach will be of interest to researchers of writing cultures and postgraduate students wishing to engage critically with the sources of history
