Applied and Environmental Microbiology ,1995 **Nongynecologic Cytopathology** Peter Spieler, Matthias Rössle, 2012-07-27 This manual for diagnostic cytologists offers detailed guidance on diagnostic problems likely to be encountered in everyday practice. It encompasses exfoliative and aspiration cytology of all major nongynecologic body sites. Each chapter opens with an algorithm that presents the reader with the relevant microscopic findings, the most important additional findings and the differential diagnostic possibilities and problems in a clear and easily remembered form. Another important feature is the wealth of high quality color photomicrographs which clearly document the visual appearances of the most important lesions and highlight the differential diagnostic difficulties. The accompanying text contains helpful general remarks and presents further relevant information on diagnostics, differential diagnostic procedures and auxiliary methods. Besides established cytologists and pathologists, cytopathologists in training and cytotechnologists will find this book to be a valuable aid.

Antidiabetic Medicinal Plants and Herbal Treatments Azamal Husen, 2023-07-17 Diabetes is a chronic condition associated with metabolic disorder. Persons suffering from diabetes have shown accelerated levels of blood sugar which often harms the heart, blood vessels, eyes, kidneys, and nerves. Over the past few decades, the prevalence of diabetes has been progressively increasing. Synthetic drugs are used to treat diabetic patients to help control the disorder, but it is shown that numerous medicinal plants and herbal drugs are widely used in several traditional systems of medicine to prevent and treat diabetes. They are reported to produce beneficial effects in combating diabetes and alleviating diabetes related complications. These plants contain phytonutrients and phytoconstituents demonstrating protective or disease preventive properties. In many developing countries, herbal drugs are recommended by traditional practitioners for diabetes treatment because the use of synthetic drugs is not affordable. Key Features: Provides botanical descriptions, distribution, and pharmacological investigations of notable medicinal and herbal plants used to prevent or treat diabetes. Discusses phytochemical and polyherbal formulations for the management of diabetes and other related complications. Contains reports on antidiabetic plants and their potential uses in drug discovery based on their bioactive molecules. This volume in the Exploring Medicinal Plants series provides an overview of natural healing treatments in selected antidiabetic plants. The book presents valuable information to scientists, researchers, and students working with medicinal plants or for those specializing in areas of ethnobotany, natural products, pharmacognosy, and other areas of allied

healthcare It is also useful to pharmaceutical companies industrialists and health policy makers **Food Packaging and Shelf Life** Gordon L. Robertson,2009-12-21 The importance of food packaging hardly needs emphasizing since only a handful of foods are sold in an unpackaged state With an increasing focus on sustainability and cost effectiveness responsible companies no longer want to over package their food products yet many remain unsure just where reductions can effectively be made Food Packaging and Shelf Life A Practical Guide provides package developers with the information they need to specify just the right amount of protective packaging to maintain food quality and maximize shelf life Current food packaging must take into consideration the biochemical chemical physical and biological changes that occur during processing distribution and storage Organized according to chapters devoted to specific food products this practical handbook defines the indices of failure for foods as diverse as milk fruits bottled water juices vegetables fish and beef It discusses the deteriorative reactions for each food and reviews how different packaging materials may influence time to failure and thus shelf life Other topics included biobased packaging packaging and the microbial shelf life of foods and shelf life testing methodology
