Microeconomics 5th Edition The Pearson Series:

Microeconomics: Basic Principles in Practice Dr. Parul Nagar, 2025-01-15 This book serves as an introduction to Microeconomics catering to readers from diverse academic backgrounds. It simplifies the subject making it relatable and easy to understand particularly in terms of graph usage and mathematical concepts. Topics are explained step by step helping students grasp the mathematical applications with ease. The book demystifies Economics highlighting how deeply it influences every sphere of life and integrates with our daily routines.

THE ABC OF MICROECONOMICS Dr. Parul Nagar, Economics as a subject pervades all spheres of knowledge and life. This book is an introduction to Microeconomics written in a simple and lucid style with the objective to demystify the subject for students coming from varied academic backgrounds. The use of day to day examples which are easily relatable helps to elucidate underlying concepts, understand the nuances of the subject and also grasp the usage of graphs and mathematical concepts. This book is intended for students of different courses at undergraduate programs, post graduate courses and for those seeking clarity and an understanding of the key concepts of Economics as applied to the world around them.

Alternative Lending Promithea Peridis, 2022-09-30 The book covers alternative lending using the emergence of Debt Funds in the EU as a case study. The book explores the risks that they can pose to financial stability and the regulatory and supervisory tools available to mitigate these risks. Through this analysis, the book uncovers the risks and potential risk mitigation tools that can be applied to the alternative lenders including debt funds and other potential alternative lenders. After identifying the reasons behind the growth of alternative lenders, using as an example the assets of Alternative Investment Funds (AIFs) and in particular debt funds and the simultaneous decrease of the banks' assets, the book analyses the systemic importance of the alternative lenders and the risk channels through which the systemic risk can spread to the banking sector and the financial system. Then the book deals with the financial innovation market failure theory and demonstrates that financial innovations e.g. debt funds securitisations can cause market failures resulting in regulatory interventions. Of interest to banking and financial regulation academics, researchers and practitioners, this book analyses the regulatory provisions in place for both credit institutions and debt funds including the Basel Accords, the Capital Requirements Directives and Regulations and the Alternative Investment Fund Managers Directive (AIFMD) and its implementation in various EU jurisdictions before offering a proposal for a new three defensive framework applicable to debt funds and to other potential alternative lenders.
