This brand new EMEA adaptation of Thomas Nechyba's popular text presents a European Middle East and African perspective whilst also being fully updated. This exciting new edition follows Professor Nechyba's five primary goals for any microeconomics course by presenting microeconomics as a way of looking at the world showing students how and why the world works, how to think more clearly and develop conceptual thinking skills providing a flexible learning style and by finally providing a roadmap for further study. Each chapter follows the A and B structure developed by Professor Nechyba allowing students to explore an intuitive approach in Part A and then focus on how the intuitive approach can be represented mathematically in Part B. This edition is also available as a MindTap with additional assessments Graph Builder and video graph presentations. It is also available with Aplia a comprehensive online learning assessment tool with autograded randomised questions to test students' understanding.

**Managerial Economics** M. J. Alhabeeb, L. J. Moffitt, 2012-11-05 Uncertainty is present in every managerial decision and Managerial Economics: A Mathematical Approach effectively demonstrates the application of higher level statistical tools to inform and clarify the logic of problem solving in a managerial environment. While illuminating managerial decision making from all possible angles, this book equips readers with the tools and skills needed to recognize and address uncertainty. The book also explores individual firm and market level decisions, discusses all possible risks and uncertainties encountered in the decision making process and prepares readers to deal with both epistemic and aleatory uncertainty in managerial decisions. Managerial Economics features an emphasis on practical application through real life examples and problems. An accessible writing style that presents technical theories in a user friendly way. A mathematical and statistical point of view that reveals the presence of uncertainty inherent in managerial decisions. Thoroughly class tested material including problems at the end of each chapter, case study questions, review exercises and objectives that summarize the main discussions. Managerial Economics is an excellent book for upper undergraduate and graduate level courses in business and economics departments. The book is also an ideal reference and resource for managers, decision makers, market analysts and researchers who require information about the theoretical and quantitative aspects of the topic.

### **Raced Markets**

Lisa Tilley,Robbie Shilliam,2021-05-30 Despite rich archives of work on race and the global economy most notably by scholars of colour and Global South intellectuals the discipline of Political Economy has largely avoided an honest confrontation with how race works within the domains it studies not least within markets By way of corrective this book draws together scholarship on the material function of race at various scales in the global political economy The collective provocation of the contributors to this volume is that race has been integral to the formation of capitalism as extensively laid out by the racial capitalism literature and takes on new forms in the novel market spaces of neoliberalism The chapters within this volume also reinforce that the current political conjuncture marked by the ascension of neo fascist power cannot be defined by an exceptional intrusion of racism nor can its racism be dismissed as epiphenomenal Raced Markets will be of great value to scholars students and researchers interested in political economy and racial capitalism as well as those willing to explore how race takes on new forms in the novel market spaces of contemporary neoliberalism The chapters in this book were originally published as a special issue of the New Political Economy
