PROFESSIONALISM Mrs. Manisha Srivastava,Mr. Anil Singh Bhadouria,Ms. Sudha Gautam,Ms. Vinaya Kumary.T,Lt Col (Dr) Regina. P. F,2023-08-07 India a

prominent country in the Asian continent has a long history of nursing care. Basically one can understand that the approach to nursing profession has been improving as many young people take up the education in nursing profession as someone gets join in any other graduate program. Florence Nightingale founder of modern nursing was the first woman to have great influence over nursing in India and had a close knowledge of Indian conditions especially in the army. The literature says that in 1865 Nightingale drew up some detailed Suggestions on a system of nursing for hospitals in India. Graduates were sent out from the Nightingale School of Nurses of St Thomas Hospital England to start similar schools in India. St Stephen's Hospital Delhi was the first one to begin training the Indian women as nurses in 1867. Quality of education and clinical exposure to nursing students are also under constant updates in the country. The reason for this change is that majority of nurses trained in India tend to move to countries abroad especially countries like Australia Canada USA UK and Europe too. Better pay and working conditions are attracting many Indian nurses are also started moving towards the west specially countries like Germany Italy Austria Netherlands etc. There are also changes in the formation of nurses in India that they are also upgrading the level of nursing education into a bachelor's degree. As per the Indian nursing council notification from 2021 onward nurses will only be trained with a bachelor's degree B Sc in nursing. Individuals need care and attention as long as they live. On the one hand demographically population and human life expectancy are increasing and the care systems demands a lot of challenges and opportunities. On the other hand experiments and the efforts to overcome diseases continue. From the experiences from India it is interesting to know that many young minds take up nursing studies when compare to paramedical courses. Nursing course is still the most likely job accelerated program in India among all other medical allied courses other than the Bachelor of Medicine program. Integrated Theory and Knowledge Development in Nursing Peggy

L. Chinn, Maeona K. Kramer, 2008 This comprehensive resource examines how nursing theory and patterns of knowing affect nursing practice. In addition to the concepts of ethical knowledge, aesthetic knowledge, and empiric knowledge development, you'll learn about the newest pattern of knowing: emancipatory knowing. This pattern centers on the human capacity to create change by envisioning desired outcomes, particularly in situations that involve injustice or social wrongs. Throughout the book, helpful activities encourage you to reflect on important concepts and explore how evidence-based nursing theory can be used to improve the quality of care. A full color insert visually demonstrates the fundamentals of knowing and includes the new concept of emancipatory knowing. Comprehensive discussions of nursing theory help you understand how theory development and nursing research apply to actual practice. Interpretive Summaries of selected conceptual frameworks highlight the essential features you need to know. A new chapter, Emancipatory Knowing for Practice, emphasizes the importance of discovering what lies beneath issues and problems, redefining these issues and problems to reveal connections between complex social and political contexts and then acting to address the underlying issues. Reflection and Discussion sections at the end of each chapter reinforce key concepts and encourage further discussion and reflective writing. The concept of using evidence-based practice to improve the quality of care is incorporated throughout, as well as how evidence-based practice contributes to theory development. Updated information on theory development incorporates the influence of emancipatory knowing and helps you connect theory and knowledge to your own experiences and everyday nursing practice.
