**The Arithmetic of Elliptic Curves** Joseph H. Silverman,2014-01-15      **Arithmetic on Elliptic Curves with Complex Multiplication** B.H. Gross,2006-11-14      **A Treatise on Algebraic Plane Curves** Julian Lowell Coolidge,2004-01-01 A thorough introduction to the theory of algebraic plane curves and their relations to various fields of geometry and analysis Almost entirely confined to the properties of the general curve and chiefly employs algebraic procedure Geometric methods are much employed however especially those involving the projective geometry of hyperspace 1931 edition 17 illustrations

**Lectures on Curves on an Algebraic Surface** David Mumford,2016-03-02 These lectures delivered by Professor Mumford at Harvard in 1963 1964 are devoted to a study of properties of families of algebraic curves on a non singular projective algebraic curve defined over an algebraically closed field of arbitrary characteristic The methods and techniques of Grothendieck which have so changed the character of algebraic geometry in recent years are used systematically throughout Thus the classical material is presented from a new viewpoint      **Elliptic Curves** James S Milne,2023-02 This book uses the beautiful theory of elliptic curves to introduce the reader to some of the deeper aspects of number theory It assumes only a knowledge of the basic algebra complex analysis and topology usually taught in first year graduate courses An elliptic curve is a plane curve defined by a cubic polynomial Although the problem of finding the rational points on an elliptic curve has fascinated mathematicians since ancient times it was not until 1922 that Mordell proved that the points form a finitely generated group There is still no proven algorithm for finding the rank of the group but in one of the earliest important applications of computers to mathematics Birch and Swinnerton Dyer discovered a relation between the rank and the numbers of points on the curve computed modulo a prime Chapter IV of the book proves Mordell s theorem and explains the conjecture of Birch and Swinnerton Dyer Every elliptic curve over the rational numbers has an L series attached to it Hasse conjectured that this L series satisfies a functional equation and in 1955 Taniyama suggested that Hasse s conjecture could be proved by showing that the L series arises from a modular form This was shown to be correct by Wiles and others in the 1990s and as a consequence one obtains a proof of Fermat s Last Theorem Chapter V of the book is devoted to explaining this work The first three chapters develop the basic theory of elliptic curves For this edition the text has been completely revised and updated      **Elliptic Curves** James S Milne,2020 This book uses the beautiful theory of elliptic curves to introduce the reader to some of the deeper aspects of number theory It assumes only a knowledge of the basic algebra complex analysis and topology usually taught in first year graduate courses An elliptic curve is a plane curve defined by a cubic polynomial Although the problem of finding the rational points on an elliptic curve has fascinated mathematicians since ancient times it was not until 1922 that Mordell proved that the points form a finitely generated group There is still no proven algorithm for finding the rank of the group but in one of the earliest important applications of computers to mathematics Birch and Swinnerton Dyer discovered a relation between the rank and the numbers of points on the curve

computed modulo a prime Chapter IV of the book proves Mordell's theorem and explains the conjecture of Birch and Swinnerton Dyer Every elliptic curve over the rational numbers has an L series attached to it Hasse conjectured that this L series satisfies a functional equation and in 1955 Taniyama suggested that Hasse's conjecture could be proved by showing that the L series arises from a modular form This was shown to be correct by Wiles and others in the 1990s and as a consequence one obtains a proof of Fermat's Last Theorem Chapter V of the book is devoted to explaining this work The first three chapters develop the basic theory of elliptic curves For this edition the text has been completely revised and updated

Curves and Their Jacobians David Mumford, 1975    **Algebraic Curves** Robert J. Walker, 1950    *Complex Algebraic Curves* Frances Clare Kirwan, 1987    **Complex Algebraic Curves** Frances Clare Kirwan, 2014-05-14 This development of the theory of complex algebraic curves was one of the peaks of nineteenth century mathematics They have many fascinating properties and arise in various areas of mathematics from number theory to theoretical physics and are the subject of much research By using only the basic techniques acquired in most undergraduate courses in mathematics Dr Kirwan introduces the theory observes the algebraic and topological properties of complex algebraic curves and shows how they are related to complex analysis    *Lectures on Equations Defining Space Curves* Lucien Szpiro, 1979    **Algebraic Curves and Their Applications** Lubjana Beshaj, Tony Shaska, 2019 This volume contains a collection of papers on algebraic curves and their applications While algebraic curves traditionally have provided a path toward modern algebraic geometry they also provide many applications in number theory computer security and cryptography coding theory differential equations and more Papers cover topics such as the rational torsion points of elliptic curves arithmetic statistics in the moduli space of curves combinatorial descriptions of semistable hyperelliptic curves over local fields heights on weighted projective spaces automorphism groups of curves h    **A Scrapbook of Complex Curve Theory** Charles Herbert Clemens, 1900
