The Dental Cosmos J. D. White, John Hugh McQuillen, George Jacob Ziegler, James William White, Edward Cameron Kirk, Lovick Pierce Anthony, 1931 *Future Music*, 2001 *Feyerabend's Formative Years. Volume 2. Feyerabend on Logical Empiricism*, Bohm & Kuhn Matteo Collodel, Eric Oberheim, 2024-08-27 The authors Matteo Collodel and Eric Oberheim take the reader on a journey through the early life of the famous Austrian philosopher Paul Feyerabend whose groundbreaking work *Against the Method* forged new paths in the philosophical understanding of science Collodel and Oberheim's book contains the translated correspondence of Feyerabend 1924-1994 with equally influential philosophers and scientists of the time including Rudolf Carnap, Herbert Feigl, Carl G. Hempel, J. J. C. Smart, David Bohm, and Thomas Kuhn. This book offers an entirely unique approach to the philosopher Paul Feyerabend. Informative, challenging, and profound, it immerses the reader deeply in the mind of a truly revolutionary philosopher of science. The main focus lies on the explanation of Paul Feyerabend's ideas on logical empiricism and quantum mechanics, which he developed especially in the 1960s. In order to appreciate the celebrated work of the philosopher, it is important to create an understanding of these formative years in Feyerabend's life and work. Anyone who knows similar discussions like the paradigm shift of Thomas Kuhn or has a passion for history, philosophy, and science will be fascinated by the works of Paul Feyerabend. As scientists and followers of Feyerabend, Collodel and Oberheim strive to pay respect to the philosopher and to make his work accessible to a whole new generation. *Transnational Environmental Policy* Reiner Grundmann, 2002-11-01 *Transnational Environmental Policy* analyses a surprising success story in the field of international environmental policy, making the threat to the ozone layer posed by industrial chemicals and how it has been averted. The book also raises the more general question about the problem-solving capacities of industrialised countries and the world society as a whole. Reiner Grundmann investigates the regulations which have been put in place at an international level and how the process evolved over twenty years in the US and Germany.

The End of the Law? David W. Opderbeck, 2021-08-12 Does neuroscience show that all our ideas about law and ethics are false? David Opderbeck answers this question with a broad and deep survey of the relationship between theology, science, and ethics. He proposes that Christian theology, which narrates the humanity and divinity of Christ in conversation with the new Aristotelianism in the philosophy of science, provides a path through secular and religious fundamentalisms alike.

Blue Book of the State of Illinois Illinois. Office of Secretary of State, 1900 **Feyerabend's Philosophy** Eric Oberheim, 2012-02-13 Paul Feyerabend ranks among the most exciting and influential philosophers of science of the twentieth century. This reconstruction of his developing ideas combines historical and systematic considerations. Part I examines the three main influences on Feyerabend's philosophical development: Wittgenstein's later philosophy, Popper's critical rationalism, and Ehrenhaft's experimental effects. Part II focuses on Feyerabend's development and use of the notion of incommensurability at the heart of his philosophical critiques and investigates his relation to realism. Feyerabend initially

developed the notion of incommensurability from ideas he found in Duhem He used the notion of incommensurability to attack many different forms of conceptual conservatism in philosophy and the natural sciences He argued against many views on the grounds that that they would constrain the freedom necessary to develop alternative points of view and thereby hinder scientific advance Contrary to widespread opinion he was never a scientific realist Part III reconstructs Feyerabend's pluralistic conception of knowledge in the context of his pluralistic philosophical method Feyerabend was a philosophical pluralist who practiced pluralism in pursuit of progress
