*Coaching Science* Terry McMorris,Tudor Hale,2006-08-30

Coaching Science and Coaching Studies courses are appearing in increasing numbers in many universities The textbooks

used in most of these courses are either theoretically based sports science texts or practically based coaching books The

former are generally lacking in application while the latter rarely have any scientific input The reader is therefore left to

make the links themselves Coaching Science will bridge that gap covering both theory and practice and most important

showing how theory informs practice The book will be multi and to some extent interdisciplinary as it is not possible to

examine the interaction between coach performer and task from a single discipline perspective Each chapter will include

overviews of the main theories but the bulk of the material will be concerned with how such theories can be applied in

practice Good and frequent use of examples will be provided Throughout the student will be given problems to solve At the

end of each chapter there will be revision notes recommended readings and questions on chapter content
