Oceans Collide One The Oceans Series:

Oceans Beverly McMillan, John A. Musick, 2007-07-24 Explores the world's oceans **Ocean States** Muhammad Munawwar, 1995-02-23 This is the first comprehensive study on archipelagic regimes published since the adoption of the United Nations Convention on the Law of the Sea in 1982. The book traces the historical evolution of the archipelagic concept in international law and examines the definition of archipelagos and archipelagic states. The nature, status and regime of the waters of different types of archipelagos is examined and analysed from the perspective of archipelagic states and is based on the requirement of such states for territorial integrity and self-determination. The book introduces the concept of Ocean States and links Ocean States with the archipelagic concept. The archipelagic concept is viewed as a practical as well as a functional basis for the determination of the territorial limits of Ocean States.

Reconstruction of the Paleo-Asian Ocean Robert G. Coleman, E. H. Juvigné, 1994 This Proceedings volume contains selected papers from two symposia which were held during the 29th International Geological Congress Kyoto Japan 24 August-3 September 1992. The first symposium Reconstruction of the Paleo-Asian Ocean contains 11 papers from a group of scientists working together in an international project of the same name. The goal of the project is to collect and evaluate petrologic and tectonic data within specific terranes so as to understand the geodynamic processes leading to the amalgamation of Asia. These papers represent vital geological discussions for interpreting the geodynamic maps being produced by the project. From the second symposium of this volume Quaternary Environmental Change 14 papers were selected. The wide range of topics can be divided as follows: Deep sea core analysis, Coral reef and nearshore environment, Paleoenvironmental analysis, Tephrae, Loess and Pedology, River morphology and others.

The Book of the Ocean Ernest Ingersoll, 1898 [Metallogenic Theory and Exploration Technology of Multi-Arc-Basin-Terrane Collision Orogeny in "Sanjiang" Region, Southwest China](#) Wenchang Li, Guitang Pan, Zengqian Hou, Xuanxue Mo, Liquan Wang, Xiangfei Zhang, 2023-08-24 This open access book presents a new structural model of multi-arc basin terrane system based on the in-depth research of the Nujiang-Lancangjiang-Jinshajiang region, especially several Paleo-Tethys ophiolitic and large belts and sets of arc basin systems, and a new orogenic model of the Hengduanshan Mountains based on penetrated research on spatial-temporal framework and orogenic models of different orogenic belts under large-scale strike-slip shear nappe structures evolution. The authors paid special attention to the coupling relation between orogeny and metallogenesis. The metallogenesis and dynamic process are probed under the crust-mantle interaction and material-energy exchange transmission background, and the tectonic units evolution. The ore genesis and distribution of deposits have been thoroughly analyzed, and the metallogenic theories of multi-arc basin terrane and intracontinental tectonic transformation in the Nujiang-Lancangjiang-Jinshajiang region have been carried out. This book also illustrates how to explore metallic deposits in the Nujiang-Lancangjiang-Jinshajiang region by using the metallogenic regulations. Meanwhile, this book has high reference value for researchers working in the fields of basic geology.
