Solitude and the Manifestations of the Solitary Characters in Selected Short Stories: An Interdisciplinary Study Najat Ismael Sayakhan, 2024-07-02 Solitude is the state of being alone or isolated from others. It is often a voluntary choice for meditation, introspection, reflection, or simply enjoying one's own company. Solitude can be peaceful and conducive to deep thinking or creativity, contrasting with loneliness, which implies a negative feeling of being alone and disconnected. This book investigates the types of solitude in twelve modern short stories written by authors of different nationalities, races, and genders. It also explores how the setting boosts the state of solitude of each character. There are different manifestations of solitude and the solitary character: a person living among other people, refusing to be part of them, unwilling to be part of them, or being refused and rejected to be part of them. This character is a child, a teenager, a man, or an abnormal, freakish man or a woman of sorrow, a recipient of much unbearable pain.

The Routledge Handbook of Corpus Translation Studies Defeng Li, John Corbett, 2024-10-28 This Handbook offers a comprehensive grounding in key issues of corpus-informed translation studies while showcasing the diverse range of topics, applications, and developments of corpus linguistics. In recent decades, there has been a proliferation of scholarly activity that applies corpus linguistics in diverse ways to translation studies. The relative ease of availability of corpora and text analysis programs has made corpora an increasingly accessible and useful tool for practising translators and for scholars and students of translation studies. This Handbook first provides an overview of the discipline and presents detailed chapters on specific areas such as the design and analysis of multilingual corpora, corpus analysis of the language of translated texts, the use of corpora to analyse literary translation, corpora and critical translation studies, and the application of corpora in specific fields such as bilingual lexicography, machine translation, and cognitive translation studies. Addressing a range of core thematic areas in translation studies, the volume also covers the role corpora play in translator education and in aspects of the study of minority and endangered languages. The authors set the stage for the exploration of the intersection between corpus linguistics and translation studies, anticipating continued growth and refinement in the field. This volume provides an essential orientation for translators and translation studies scholars, teachers, and students who are interested in learning the applications of corpus linguistics to the practice and study of translation.

Digital Transformation of Identity in the Age of Artificial Intelligence Kazuhiko Shibuya, 2020-02-19 This book examines the digital transformation of identity in the age of artificial intelligence. It articulates the nature of identity of human beings based on cutting-edge knowledge in the field of AI and big data sciences and discusses identity by drawing on comprehensive investigations in digital social sciences and exploring wider disciplines related to philosophy, ethics, sociology, STS, computer sciences, engineering, and medical sciences. Reviewing contemporary conditions proliferated by advanced technological trends and unveiling social mechanisms of human identity, this book appeals to undergraduate and graduate students as well as academic researchers.
