AutoCAD 2008 3D Modeling Workbook For Dummies Lee Ambrosius,2007-07-30 AutoCAD 2007 features a new 3D rendering engine that greatly enhances the program's 3D functionality and makes this industry standard drafting program even more difficult to master even for veteran users. This focused For Dummies workbook gives people the practice they need to get up to speed on the new 3D features with dozens of problems and step by step solutions for modeling, shadowing and lighting. Topics covered by the problems include 2D geometric construction, 3D solid modeling, 3D surface modeling, rendering and imaging, dimensioning and drafting, and model interchange. Used by architects, engineers, and draftspeople, AutoCAD is the 1 computer aided design CAD software in the world with an installed base of 6.7 million users. The accompanying DVD provides videos that illustrate select problems and solutions presented in the workbook. Energy Efficiency in

Buildings José Manuel Andújar,Sergio Gómez Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO2 per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed
