Emerging Research and Practices on First-Year Students Ryan D. Padgett, 2014-08-29 What factors contribute to students lasting success Much research has explored the impact of the first year of college on student retention and success With the new performance based funding initiatives institutional administrators are taking a laser focused approach to aligning retention and success strategies to first year student transition points This volume enlightens the discussion and highlights new directions for assessment and research practices within the scope of the first year experience Administrators faculty and data scientists provide a conceptual and analytical approach to investigating the first year experience for entry level and seasoned practitioners alike The emerging research throughout this volume suggests that while many first year programs and services have significant benefits across a number of success outcomes these benefits may not be universal for all students This volume Examines sophisticated empirical models Provides critical assessment practices and implications Examines the four year college and the two year institution which is just as critical This is the 161st volume of this Jossey Bass quarterly report series Timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Mutual Impact of Computing Power and Control Theory M. Kárny, K. Warwick, 2012-12-06 Recent rapid developments in computing power such as parallel processing and neural networks have stimulated new trends in control However a discrepancy exists between available computing power and exploitable algorithms obtained classically from control theory The aim of this book is to address the discrepancy from both the computational power and control theory viewpoints Areas such as identification adaptive control signal processing and neural networks therefore hold a prominent position in the text presented The form of the book is such that it should be useful for readers at various levels particularly those at the research and or application stage The book has resulted from the IFAC Workshop on the Mutual Impact of Computing Power and Control Theory which was held at the Institute of Information Theory and Automation UTIA Prague in September 1992 Organisation of the event was provided jointly by the Department of Adaptive Systems UTIA Prague and the School of Engineering and Information Sciences University of Reading UK Selected papers from the Workshop have been chosen to give a good balance across the field whilst at the same time highlighting important areas for future research In this way the book represents edited Proceedings from the Workshop One point quickly apparent is the international nature of the presentations themselves which provide not only a technical appraisal of the field but also inject cultural aspects which are vitally important on the path ahead

[The Global Politics of Artificial Intelligence](#) Maurizio Tinnirello, 2022-04-24 Technologies such as artificial intelligence have led to significant advances in science and medicine but have also facilitated new forms of repression policing and surveillance AI policy has become without doubt a significant issue of global politics The Global Politics of Artificial Intelligence tackles some of the issues linked to AI

development and use contributing to a better understanding of the global politics of AI This is an area where enormous work still needs to be done and the contributors to this volume provide significant input into this field of study to policy makers academics and society at large Each of the chapters in this volume works as freestanding contribution and provides an accessible account of a particular issue linked to AI from a political perspective Contributors to the volume come from many different areas of expertise and of the world and range from emergent to established authors Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Domestic Colonies Barbara Arneil, 2017-10-06 Modern colonization is generally defined as a process by which a state settles and dominates a foreign land and people This book argues that through the nineteenth and into the first half of the twentieth centuries thousands of domestic colonies were proposed and/or created by governments and civil society organizations for fellow citizens as opposed to foreigners and within their own borders rather than overseas Such colonies sought to solve every social problem arising within industrializing and urbanizing states Domestic Colonies argues that colonization ought to be seen during this period as a domestic policy designed to solve social problems at home as well as foreign policy designed to expand imperial power Three kinds of domestic colonies are analysed in this book: labour colonies for the idle poor, farm colonies for the mentally ill and disabled and utopian colonies for racial, religious and political minorities All of them were justified by an ideology of colonialism that argued if people were segregated in colonies located on empty land and engaged in agrarian labour this would improve both the people and the land Key domestic colonialists analysed in this book include Alexis de Tocqueville, Abraham Lincoln, Peter Kropotkin, Robert Owen and Booker T. Washington The turn inward to colony thus requires us to rethink the meaning and scope of colonization and colonialism in modern political theory and practice

Archives of Acoustics Quarterly, 2012

Speed Vaclav Smil, 2025-11-27 Prepare to view the world through a new lens SPEED a groundbreaking exploration that challenges your perceptions of life's driving force from the internationally bestselling author There is no author whose books I look forward to more Bill Gates There is perhaps no other academic who paints pictures with numbers like Smil Guardian In a world that feels like it's moving faster than ever Smil examines how our relentless pursuit of speed in areas such as production, travel and communication shapes not only our technological landscape but also our social and environmental realities And through engaging anecdotes and striking statistics Smil challenges the assumption that faster is always better He invites readers to reconsider the implications of our collective obsession with speed and its intricate relationship with nature and innovation For example, he highlights the surprising fact that erosion can actually accelerate mountain growth and he points out that the rapid adoption of mobile phones, achieving 90 per cent penetration in just nineteen years, reflects historical patterns of technological adoption, suggesting that our world may not be moving significantly faster than in the past Whether exploring the tiny mites that can traverse 300 times their body length in

a second or the societal impacts of high frequency trading Speed invites readers to engage in a more balanced conversation about the role of speed in our lives in an age defined by haste *County Gentleman and Land and Water* ,1905 **Turf, Field, and Farm** ,1901
