R Data Analysis without Programming David W. Gerbing,2013-12-13 This book prepares readers to analyze data and interpret statistical results using R more quickly than other texts R is a challenging program to learn because code must be created to get started To alleviate that challenge Professor Gerbing developed lessR LessR extensions remove the need to program By introducing R through less R readers learn how to organize data for analysis read the data

into R and produce output without performing numerous functions and programming exercises first. With lessR readers can select the necessary procedure and change the relevant variables without programming. The text reviews basic statistical procedures with the lessR enhancements added to the standard R environment. Through the use of lessR R becomes immediately accessible to the novice user and easier to use for the experienced user. Highlights of the book include Quick Starts that introduce readers to the concepts and commands reviewed in the chapters. Margin notes that highlight define illustrate and cross reference the key concepts. When readers encounter a term previously discussed the margin notes identify the page number to the initial introduction. Scenarios that highlight the use of a specific analysis followed by the corresponding R lessR input and an interpretation of the resulting output. Numerous examples of output from psychology business education and other social sciences that demonstrate how to interpret results. Two data sets provided on the website and analyzed multiple times in the book provide continuity throughout. End of chapter worked problems help readers test their understanding of the concepts. A website at www.lessRstats.com that features the lessR program the book's data sets referenced in standard text and SPSS formats so readers can practice using R lessR by working through the text examples and worked problems. PDF slides for each chapter solutions to the book's worked problems links to R lessR videos to help readers better understand the program and more. An ideal supplement for graduate or advanced undergraduate courses in statistics research methods or any course in which R is used taught in departments of psychology business education and other social and health sciences this book is also appreciated by researchers interested in using R for their data analysis. Prerequisites include basic statistical knowledge. Knowledge of R is not assumed.

[Creating Adobe Acrobat Forms](#) John Deubert,2002 Thanks to Adobe Acrobat and the cross platform PDF files it creates
we can all crawl out from under the mountains of paper that clutter our desktops and counters Organizations like the IRS
which now lets you download important tax forms from its Web site instead of trudging to the post office have discovered

Acrobat's powerful ability to streamline the once tedious and time consuming task of data collection. With Creating Adobe Acrobat Forms you too can create your own electronic forms and reduce both your paper piles and workload. Creating Adobe Acrobat Forms covers everything you need to know to build an attractive functional form starting with the basics of form design and continuing through the data submission process. On the design side you'll learn how to create and arrange all the interactive items that make up an electronic form including links, buttons, pop up menus and digital signatures. The book also shows you how to connect your Acrobat forms to an external server allowing it to automatically transfer submitted data to a company database or Web site. Author John Deubert realizes that even the best designed forms are useless if you don't know what to do with them so he also lays out how best to harness the raw data once you've collected it and even supplies form files so you can follow along as he covers the techniques.
