The Bloomsbury Handbook of Religious Education in the Global South Yonah Hisbon Matemba,Bruce A. Collet,2022-02-10 The Bloomsbury Handbook of Religious Education in the Global South presents new comparative perspectives on Religious Education RE across the Global South Including 23 chapters written by scholars from the Global North and South this is the first authoritative reference work on the subject The handbook is thematically organised into seven sections The first three sections deal with provision response to changes in contemporary society and decolonizing RE The next four sections explore young people and RE perspectives on teachers RE in higher education and finally challenges and opportunities for RE The term Global South is used here primarily to signify the deep economic divide with the Global North but the concept is also examined in historical geographical political social and cultural terms including the indelible influence of religion in all four broadly defined regions Exploring RE from local cross national as well as regional and sub regional perspectives the handbook examines RE from its diverse past present realities and envisioned future revealing not only tensions contestations injustices and inequalities of power but importantly how inclusive forms of RE can help solve these problems Groupthink in Science David M. Allen,James W. Howell,2020-04-23 This book discusses one of the hottest topics in science today i e the concern over certain problematic practices within the scientific enterprise It raises questions and more importantly begins to supply answers about one particularly widespread phenomenon that sometimes impedes scientific progress group processes The book looks at many problematic manifestations of going along with the crowd that are adopted at the expense of truth Closely related is the concept of pathological altruism or altruism bias the tendency of scientists to bias their research in order to further the ideological or financial interests of an in group at the expense of both the interest of other groups as well as the truth The book challenges the widespread notion that science is invariably a benevolent benign process It defines the scientific enterprise in practice as opposed to in theory as a cultural system designed to produce factual knowledge In effect the book offers a broad and unique take on an important and incompletely explored subject research and academic discourse that sacrifices scientific objectivity and perhaps even the scientist s own ethical standards in order to further the goals of a particular group of researchers or reinforce their shared belief system or their own interests whether economic ideological or bureaucratic **The Superpower Myth** Nancy Soderberg,2005-02-11 Are there limits to American power Drawing on eight years as a high ranking official in the Clinton Administration Nancy Soderberg takes you behind the scenes to examine how the president and his advisors responded to the challenge of shaping a new foreign policy for the post Cold War era She cites personal recollections recently declassified documents and

interviews with the principals involved to provide insight into the decision making process that all presidents face Soderberg contrasts Clinton's approach as it evolved from a shaky start to a carefully crafted blend of diplomacy force leadership and cooperation with Bush's embrace of the superpower myth which holds that America is powerful enough to bend the world to its will through unilateral force Soderberg demonstrates why military force alone is not always effective why allies and consensus building are crucial and how the current administration's faulty worldview has adversely affected our security
