**Building from Waste** Dirk E. Hebel, Marta H. Wisniewska, Felix Heisel, 2014-09-25 Reduce Reuse Recycle and Recover is the sustainable guideline that has replaced the Take Make Waste attitude of the industrial age. Based on their background at the ETH Zurich and the Future Cities Laboratory in Singapore the authors provide both a conceptual and practical look into materials and products which use waste as a renewable resource. This book introduces an inventory of current projects and building elements ranging from marketed products among them facade panels made of straw and self healing concrete to advanced research and development like newspaper wood or jeans denim used as isolating fibres. Going beyond the mere recycling aspect of reused materials it looks into innovative concepts of how materials usually regarded as waste can be processed into new construction elements. The products are organized along the manufacturing processes densified reconfigured transformed designed and cultivated materials. A product directory presents all materials and projects in this book according to their functional uses in construction load bearing self supporting insulating waterproofing and finishing products

The State of Arab Cities 2012, 2012 The Arab world has played a very important role in the history of urbanization. It is the region where urban civilization was born and where urban matters have been addressed for centuries. The Arab urban civilization as it has evolved over the past millennium has generated some of the most beautiful cities in the world. This publication is the first ever to comprehensively analyze urbanization processes in the Arab States through the review of its four sub regions the Maghreb the Mashreq the Gulf Cooperation Council countries and the least developed Arab countries of the Southern Tier
