Aryadoust,Thomas Eckes,Yo In'nami,2020-12-30 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **Teaching Literacy Effectively in the Modern Classroom for Ages 5-8** Sue Dymock,Tom Nicholson,2024-08-12 Designed as a one stop shop for classroom teachers this book covers assessment planning and progression of writing spelling decoding vocabulary and comprehension to expand the teaching toolbox Dymock and Nicholson explore major focus areas in literacy instruction for teachers based on data driven research advances They provide the teacher a handy reference manual to consult when designing lessons to teach young children from diverse backgrounds to help them read and write for success A general discussion of the research literature is built into the structure of the book to give teachers a knowledge base to teach and explain to children the why and the how of what they are learning The chapters cover recent concepts of structured literacy including systematic teaching of decoding skills vocabulary comprehension writing and spelling This practical guide uses a scope and sequence approach to teaching

that gives children a solid foundation of reading and writing skills. The resources and lesson ideas will engage diverse groups in a classroom including those at risk of literacy difficulties such as dyslexia so they also can achieve typical achievement levels for their age and beyond. Containing a wealth of resources and tips for teaching children ages 5-8 alongside easily downloadable lesson plans, hand drawn charts and posters, this book will be of great interest to all classroom teachers involved in teaching literacy. This resource-filled book will appeal to teachers, professionals and researchers in teacher training with a focus on the needs of the teacher providing practical and insightful ways to teach effectively in diverse classroom settings. **Education 3.0 and eLearning Across Modalities** Borden, Jeff D., 2021-08-20

For many years there has been a quest to discover the best teaching and learning methods in order to strengthen the classroom and the mind. Researchers now know more than ever before about the brain's impact on learning, historical triggers that lead to deep learning and how to scale education with technology. Yet much of what is known is underutilized in the classrooms of today if leveraged at all. **Education 3.0 and eLearning Across Modalities** showcases effective practices based on innovative initiatives, research and practitioner experiences from the past two decades. The effective practices of multi-modal learning which are well known to practitioners but largely unknown to the general academic are explained in detail while making each technique approachable and attainable regardless of institution size or modality. Covering topics such as distance learning, modern learning technologies and learning innovation, this book is essential for teachers, educational software developers, IT consultants, instructional designers, curriculum developers, graduate students, undergraduate students, academicians, administrators, higher education faculty and researchers.

Theoretical Models and Processes of Literacy Misty Sailors, Donna E. Alvermann, 2018-10-03

The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars. Two decades into the 21st century, the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways: the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era; the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes; and most notably, contemporary literacy models and processes enhance and extend earlier theories of reading and writing. Providing a tapestry of models and theories that have informed literacy research and instruction over the years, this volume's strong historical grounding serves as a springboard from which new perspectives are presented. The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution. This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them. Some additional archival essays from previous editions are available on the book's eResource. New to the Seventh Edition Features chapters on emerging and contemporary theories that connect

directly to issues of power and contrasts new models against more established counterparts New chapters reflect sweeping changes in how readers and writers communicate in a digital era Slimmer volume is complemented by some chapters from previous editions available online *Madness and Creativity: Yes, No or Maybe?* Anna Abraham,2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life it initiated a strong impetus to empirically investigate the association between mental health and creativity A variety of approaches and combinations of approaches have been adopted to address this association including clinical personality psychometric behavioral cognitive historiometric and neuroscientific Despite the ever accumulating body of evidence over the past six decades investigating this link what is lacking is a comprehensive overview of the disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental illness And if such a link does exist what is the nature of this association The purpose of this Research Topic was to motivate theorists and researchers to answer this question or at least attempt to do so given the available evidence thus far The themes of interest that were open to exploration in view of this topic included a Which mental disorders are positively associated with creativity b Which mental disorders are negatively associated with creativity c The dynamics of information processing biases positive versus negative associated with psychiatric and high risk populations d Theories regarding the madness creativity link e Personality based studies on creativity f Creativity mental illness and the brain g Genes and creativity h How can studies on neurological populations inform this debate i What are the areas of impact with regard to real world applications and practice j Historical timeline of this question k Evolutionary perspectives on the madness creativity link l Methodological problems associated with this field m Philosophical issues to bear in mind when investigating this domain n The usefulness of the troubled genius concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters As a result of adopting this inclusive approach the contributions showcase a wide variety of perspectives from academic departments and institutions the world over What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful **Languages in Africa** Elizabeth C. Zsiga,One Tlale Boyer,Ruth Kramer,2015-03-03 People in many African communities live within a series of concentric circles when it comes to language In a small group a speaker uses an often unwritten and endangered mother tongue that is rarely used in school A national indigenous language written widespread sometimes used in school surrounds it An international language like French or English a vestige of colonialism carries prestige is used in higher education and promises mobility and yet it

will not be well known by its users The essays in Languages in Africa explore the layers of African multilingualism as they affect language policy and education Through case studies ranging across the continent the contributors consider multilingualism in the classroom as well as in domains ranging from music and film to politics and figurative language The contributors report on the widespread devaluing and even death of indigenous languages They also investigate how poor teacher training leads to language related failures in education At the same time they demonstrate that education in a mother tongue can work linguists can use their expertise to provoke changes in language policies and linguistic creativity thrives in these multilingual communities *Library & Information Science Abstracts* ,2004 **Tiered Fluency**

Instruction Chase Young,Timothy V. Rasinski,2017 Fluency is an important part of comprehension but how can teachers make sure they've providing the support that all readers need This resource will provide fluency support for all students including disfluent readers Chapters are included on RTI Tiers assessment and ways to integrate technology **Partnering for Fluency** Mary Kay Moskal,Camille Blachowicz,2006-02-25 Fluency instruction can be seamlessly incorporated into any elementary classroom with the help of this indispensable guide Provided are fluency development ideas that are effective and motivating including whole class and small group lessons student managed activities and procedures involving classroom volunteers The emphasis on partner based learning and the wealth of practical applications make this book unique Teachers will also appreciate the many real life examples tips from other practitioners and recommended resources Special features include reproducible assessment tools
