**The Ethics of a Potential Urbanism** Camillo Boano, 2016-11-25 The Ethics of a Potential Urbanism explores the possible and potential relevance of Giorgio Agamben's political thoughts and writings for the theory and the practice of architecture and urban design. It sketches out the potentiality of Agamben's politics which can affect change in current architectural and design discourses. The book investigates the possibility of an inoperative architecture as an ethical shift for a different practice just a little bit different but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come. This particular reading from Agamben's oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness, cultural irrelevance, economic reductionism, and proto avant garde extravagance, contributing to a renewed critical encounter with architecture's aesthetic political function.

**Peacebuilding Legacy** Sukanya Podder, 2022-08-08 A fundamental challenge plagues the global peacebuilding community: How can technocratic approaches to peacebuilding that are rooted in short-term project-based execution of activities further the longer-term transformative outcomes like altering young people's attitudes and beliefs about peace and violence? In response to this global challenge, in *Peacebuilding Legacy* Sukanya Podder analyzes the long-term effects of peacebuilding programmes involving children and young people. Podder unpacks the concept of peacebuilding legacy through the lens of time transformation and intergenerational peace. Podder also develops unique qualitative cues for measuring legacy in terms of the institutional, normative, and organizational logics. If norms resonate strongly with the local context, they are likely to encourage strong retention and meaningful adoption over time. Successful institutionalization of project models through planned handover to successor national organizations or government departments holds the key to stronger local ownership. Organizational learning and reflection can support this process through a more strategic approach to programming and through post-exit studies. Regarding attitude change, Podder found that the media and peace education projects that targeted individuals ingrained beliefs and values but overlooked the role of group social norms had only limited persuasive effects. To shift the values, practices, norms, and beliefs of the younger generation, the mindset of the older generation must also be targeted. Changes in the legal, political, economic, and other social institutions are critical for long-term and meaningful transformation. This requires adopting an ecological model of peace.

**Traditional Knowledge in Food Activism and Governance** Andrea Pieroni, Michele Filippo Fontefrancesco, Ina Vandebroek, 2024-08-16 The current debate on Traditional Knowledge TK and food heritage has had momentum in recent years mainly thanks to the remarkable interest of some local and national institutions small scale producers and emerging chefs However in the scientific arena the process of documenting traditional knowledge and the heritage of local foods is often addressed by itself and is not well connected to deeper reflections of the actual participatory processes involved in local development or to the manners through which TK informs public discourse regarding local foods and how this may further influence activists institutions and governance
