**Reading Comprehension Research and Testing in the U.S.** Arlette Ingram Willis, 2012-09-10 This book challenges traditional sanctioned and official histories of reading comprehension by examining how ideological and cultural hegemony work to reproduce dominant ideologies through education in general and reading comprehension research and testing specifically Willis analyzes the ideological and cultural foundations that underpin concepts theories research tests and interpretations and connects these to the broader social and political contexts within U S history in which reading comprehension research and testing have evolved The reconstruction of a history of reading comprehension research and testing in this way demystifies past and current assumptions about the interconnections among researchers reading comprehension research and standardized reading comprehension tests A promising vision of the future of reading comprehension research and testing emerges one that is more complex multidimensional inclusive and socially just Reading Comprehension Research and Testing in the U S aims to revolutionize how reading comprehension is conceived theorized tested and interpreted for all children This is a critically relevant volume for educational researchers teacher educators school administrators teachers policy makers and all those concerned with school literacy and educational equity

**Reading Fluency** Timothy Rasinski, William Rupley, David Paige, Chase Young, 2021-01-21 Reading fluency has been identified as a key component of proficient reading Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement Despite the great potential for fluency to have a significant outcome on students reading achievement it continues to be not well understood by teachers school administrators and policy makers The chapters in this volume examine reading fluency from a variety of perspectives The initial chapter sketches the history of fluency as a literacy instruction component Following chapters examine recent studies and approaches to reading fluency followed by chapters that explore actual fluency instruction models and the impact of fluency instruction Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention Two articles on assessment one focused on word recognition and the other on prosody expand our understanding of fluency measurement Finally a study from Turkey explores the relationship of various reading competencies including fluency in an integrated model of reading Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction

**The Education of d/Deaf and Hard of Hearing Children** Peter V. Paul, 2020-02-12 A significant number of d Deaf and hard of hearing d Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere To provide an understanding of this issue this book explores the theoretical underpinnings and synthesizes major research findings It also covers critical controversial areas such as the use of assistive hearing devices language and literacy assessments and inclusion Although the

targeted population is children and adolescents who are d Dhh contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language Collectively this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d Dhh students It is clear that there is not a one size fits all concept but rather research and instruction should be differentiated to meet the needs of d Dhh students It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason based practices for improving language and literacy abilities of d Dhh students

processing and what the exact contributions of subcortical and cerebellar regions to reading are The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above particularly how these findings can explain or model the different processes mechanisms pathways or cognitive strategies by which the human brain sees words The introductory editorial summarising the contributions included here highlights how varieties of behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems
