the following approaches will differentiate themselves by reducing the distance between the government and the public: this suggests that the new government will be applying a more open and inclusive communication strategy. This will be encouraging a more transparent and positive image of the new government among the public and will help to build public trust.

It is interesting that there are apparently good causal relationships between variables that are causally independent of each other. For example there is a strong relationship between the number of species and the number of individuals in a community. It may be that this is because species with more individuals are more likely to have more individuals following predation, or because the more individuals there are the more likely it is that some individuals will survive.
