To address the current issues in politics, Sodaro has come up with a number of political approaches that can be used to understand the political ideologies of people (Sodaro 12). In his book, Sodaro has critically explained the trend politics in several countries.

To achieve this, he has explained the types of governments that different countries have, their status of democracy, social status and their economic stability. He has also explained factors that may influence the politics of a given country.

The first part of the book critically analyzes core political topics. It mainly focuses on the key issues that may affect the politics of a given country. This includes economic stability, political ideologies, international relations and personal interests of political leaders.

It is evident that many governments in the world are striving to improve their socio-political and economic status. To achieve this goal, they apply a number of strategies. However, it has been difficult for most of them to achieve this dream due to a number of factors that act as setbacks in their development (The Economist 6).

Democracy may or may not be viewed as a crisis depending on the level of its participation. When the level of political participation by individuals is high, there are high chances that a crisis may arise. At the same time, when the level of political participation is low, there are chances that a crisis may occur.

High levels of democracy tend to reduce the power of the government. This in turn increases the level of apathy and reduces the level of public trust among individuals. The government therefore cannot make tight decisions without the approval of its subjects. In many instances, this is viewed as democracy.

However, in most cases, it tends to make the process of decision making to be difficult. This in turn makes it difficult for the government to improve the social and economic status of the nation (Southhall 16). As a result, individuals will be demanding more from the government while it can only produce less.
