*Michaël Borremans* Michaël Borremans,Christine Kintisch,2013 Belgian artist Micha l Borremans born 1963 is among the most brilliant painters of emotion of the past half century An heir to the sober enigmatic character studies of Manet and Velazquez and the thick indoor atmospheres of Vermeer Borremans has greatly advanced this tradition in part through his incorporation of cinematic allusion and of that uniquely Belgian take on Surrealism that is at once deeply phlegmatic and bizarrely comical Any divisions between realism and flights of fantasy are mysteriously abolished by Borremans however leaving the viewer to confront his intense almost claustrophobic painterly world Published for an exhibition at BAWAG Contemporary in Vienna Magnetics presents a concise selection of a dozen canvases made over the past five years examined in dialogue with the artist s drawings and films

*Michaël Borremans, Mark Manders* Hiromi Kurosawa,2020 Both Micha l

Borremans and Mark Manders are known to the world for unique and unconventional expression grounded in the proud traditions of European art The 21st Century Museum of Contemporary Art Kanazawa is now delighted to present Double Silence an exhibition that will see the works of these two artists occupying the same space for the first time

[Plasma Sources of Solar System Magnetospheres](#) Andrew F. Nagy,Michel Blanc,Charles Chappell,Norbert Krupp,2016-01-27 This volume reviews what we know of the corresponding

plasma source for each intrinsically magnetized planet Plasma sources fall essentially in three categories the solar wind the ionosphere both prevalent on Earth and the satellite related sources Throughout the text the case of each planet is described including the characteristics chemical composition and intensity of each source The authors also describe how the plasma generated at the source regions is transported to populate the magnetosphere and how it is later lost To summarize the

dominant sources are found to be the solar wind and sputtered surface ions at Mercury the solar wind and ionosphere at Earth the relative importance of the two being discussed in a specific introductory chapter Io at Jupiter and a big surprise of the Cassini findings Enceladus at Saturn The situation for Uranus and Neptune which were investigated by only one fly by each is still open and requires further studies and exploration In the final chapter the book offers a summary of the little we know of Uranus and Neptune then summarizes in a comparative way what we know of plasma sources throughout the solar system and proposes directions for future research    Index of Patents Issued from the United States Patent Office United States.
