Smart Home Calm River Mindfulness, AI, 2025-02-22 *Smart Home Calm* explores how technology can transform your home into a haven of tranquility. In today's hectic world, stress is rampant. By strategically implementing smart home devices, this book argues you can significantly reduce everyday stressors and cultivate a more balanced home environment. For instance, automated lighting can mimic natural light, positively impacting mood, while smart thermostats ensure optimal temperature for relaxation. The book begins by examining the science of stress and how your home environment contributes to it. Broken into three key themes, it progresses through optimizing your physical environment with smart lighting and air purification, streamlining daily routines by automating tasks such as cleaning and cooking, and enhancing well-being through technology that supports mindfulness and relaxation. The book uniquely focuses on stress reduction through home automation, setting it apart from purely tech-focused guides.

The Internet of Things Michael Miller, 2015-03-13 How the Internet of Things will change your life, all you need to know in plain English. The Internet of Things (IoT) won't just connect people; it will connect smart homes, appliances, cars, offices, factories, cities, the world. You need to know what's coming. It might just transform your life. Now, the world's #1 author of beginning technology books has written the perfect introduction to IoT for everyone. Michael Miller shows how connected smart devices will help people do more, do it smarter, do it faster. He also reveals the potential risks to your privacy, your freedom, and maybe your life. Make no mistake: IoT is coming quickly. Miller explains why you care, helps you use what's already here, and prepares you for the world that's hurtling toward you. What is IoT? How does it work? How will it affect me? What's realistic and what's just hype? How smart is my smart TV really? And is it watching me? Can smart IoT devices make me healthier? Will smart appliances ever be useful? How much energy could I save with a smart home? What's the future of wearable tech? When will I have a self-driving car? When will I have a nearly self-driving car? Hint: Surprisingly soon. Is IoT already changing the way I shop? What's the future of drones at war and in my neighborhood? Could smart cities lower my taxes? Who gets the data my devices are collecting? How can I profit from the Internet of Things? What happens when the whole world is connected? Will I have any privacy left at all?
