single case. Designed to be the core text for couple therapy courses the book begins by introducing the field as well as presenting Carissa and Steve a couple whom readers will follow as each model is applied to their case. The chapters focus on 11 different theoretical models such as Bowen family systems theory, emotionally focused couple therapy, the Gottman method, solution focused couples counseling, narrative couple therapy, and more with expert therapists writing on each of these unique models. Each chapter addresses the history of the model, the conceptualization of problem formation, diversity considerations, and the conceptualization of problem resolution. With session transcripts throughout this book allows training therapists to easily compare, contrast, and apply the most prevalent models in couples counseling. This textbook is a core text for graduate marriage and family therapy, mental health counseling, clinical psychology, and social work students. The book is also useful for practicing professionals who want to explore how to apply a specific model of counseling to couples.

**The Therapeutic Relationship in Psychoanalysis, Counselling Psychology and Psychotherapy**

Petrūska Clarkson, 1995. It is often the therapeutic relationship between client and therapist which is more important than the theoretical orientation. This book deals with the uses and abuses of the therapeutic relationship in counselling psychology, psychotherapy and related fields. It provides a framework for integration pluralism or deepening singularity with reference to five kinds of therapeutic relationship potentially available in every kind of counselling or psychodynamic work. The original paper and framework upon which this book is based has been widely acclaimed within psychotherapeutic humanistic and psychoanalytic circles internationally. It has been found useful by adherents of a single orientation as well as by practitioners who draw from several approaches. In addition it has formed the basis for several courses in counselling and psychotherapy which have been recognised by national and international accrediting organisations. Dealing with an issue of increasing complexity the book will be of great value and significance to psychotherapists, psychoanalysts, clinical and counselling psychologists and other professionals working in the field of helping human relationships such as doctors, social workers, teachers and counsellors. Informed lay people particularly those who are involved in the helping professions may also find it of interest and benefit.

*Object Relations Therapy of Physical and Sexual Trauma* Jill Savege Scharff, David E. Scharff, 1994

Rising above the polemics surrounding sexual and physical abuse David and Jill Savege Scharff bring a relational perspective to the integration of psychoanalytic and trauma theories in order to understand the effects of overwhelming physical or psychological trauma including sexual abuse injury and birth defect The Scharffs draw from their object relations therapy with individuals families and couples recovering from trauma an abundance of relevant clinical examples described in their characteristically personal and vivid style Their treatment approach influenced by Fairbairn Klein and Winnicott is respectful of the patient's experience They advise avoiding premature interpretations that impose their own reality on patients because this traumatizes them just as their abuser did In order to work well with these traumatized people the clinician must be able to tolerate ambiguity and sustain longterm therapy for it takes the patience of waiting and wondering to recover deeply repressed memories explore them thoroughly and evaluate their meaning and importance for the patient The Scharffs demonstration of clinical processes helps therapists contain their own countertransference to trauma so as to be fully present with their clients and consistently able to confront abuse patterns in society The object relations approach not only deals with trauma's impact on the individual but views it in its cultural and interpersonal context as well Society alternately emphasizes and ignores trauma so that an encapsulated traumatic experience festers until the next eruption just as dissociative defenses segmentally protect and exaggerate traumatic experience in the individual case The Scharffs review Kramer's Mahlerian approach McDougall's insights into the silence of the psyche and the words of the soma and Anzieu's elaboration of the body ego They resuscitate Freud's seduction hypothesis and the traumatic basis of the repetition compulsion They compare and contrast the concepts of repression and dissociation Moving from there to develop an object relations perspective they draw on Winnicott's concepts of the psychosomatic partnership the environmental and object mothers and the potential space Klein's contributions of the infusion of aggression and death anxiety into developmentally critical relationships Fairbairn's view of the endopsychic situation with reference to his early unpublished papers on childhood sexual abuse that presage his later theory building and their own studies of couple and family dynamics Classical psychoanalysis introduced theories of trauma but later devoted itself to the study of infantile trauma that caused conflict based neurosis rather than actual neurosis Modern trauma theory on dissociative phenomena and post traumatic stress disorder studied after combat the Holocaust and natural disasters comes from the fields of veteran and child developmental psychiatry hypnotism and multiple personality research Trauma theory and psychoanalysis have been on separate tracks Object relations theory offers a bridge between individual and societal experiences of trauma and prepares the way for a less dissociated response to trauma issues among the mental health professions and their psychotherapy literature Object Relations and Self Psychology Michael St. Clair, 2000 This unique book makes object relations and self psychology accessible to readers not familiar with recent psychoanalytical literature The theories presented illuminate areas of childhood experiences such as relational problems and narcissistic and borderline personality disorders Readers will find clinical insights about object relations and self psychology

Epstein, 1998-08-27 Most people believe their emotions are automatic reactions to events. Events happen and trigger emotions and that is all there is to it. Few realize that their emotions are determined by what they think by how they interpret events and not by the events themselves. Epstein provides techniques for gaining control of emotions and putting them to positive use while also developing the theoretical insights behind such control.
