Book Education Socialism Historical Current Perspectives:

Education in/for Socialism Tom Griffiths, Zsuzsa Millei, 2017-10-02 This book re-examines aspects of historical socialism and includes case studies of education within twenty-first century socialist and post-socialist contexts shaped by the trajectories of historical socialism. Through these case studies, contributions offer insights into key questions: How are education systems and student subjectivities shaped by post-socialist trajectories and current regional politics, economics, and resistance movements? How do sedimented socialist discourses and geographies alter and contest the neoliberal child and childhood in post-socialist education? How have disjunctures between the rhetoric of historical Marxism-Leninism and the practices of educators, students, and student political organizations played out under socialism, and what could we learn from that for our present? How much emancipatory potential is there in the theories and practices of popular education for combatting injustice in the absence of mass revolutionary political parties? Above all, this volume affirms the need to move beyond simplistic accounts of historical socialism and post-socialist transitions. By exploring how socialist trajectories remain influential and have potential in our current contexts, this book contributes to the work of politically engaged educators working to re-imagine and reconstruct education. This book was originally published as a special issue of *Globalisation Societies and Education*.

Childhood and Schooling in (Post)Socialist Societies Iveta Silova, Nelli Piattoeva, Zsuzsa Millei, 2017-12-07 This book explores childhood and schooling in late socialist societies by bringing into dialogue public narratives and personal memories that move beyond imaginaries of Cold War divisions between the East and West. Written by cultural insiders who were brought up and educated on the eastern side of the Iron Curtain, spanning from Central Europe to mainland Asia, the book offers insights into the diverse spaces of socialist childhoods interweaving with broader political, economic, and social life. These evocative memories explore the experiences of children in navigating state expectations to embody model socialist citizens and their mixed feelings of attachment, optimism, dullness, and alienation associated with participation in building socialist futures. Drawing on the research traditions of autobiography, autoethnography, and collective biography, the authors challenge what is often considered normal and natural in the historical accounts of socialist childhoods and engage in re-writing histories that open space for new knowledges and vast webs of interconnections to emerge. This book will be compelling reading for students and researchers working in education, sociology, and history, particularly those within the interdisciplinary fields of childhood and area studies. The authors of this beautiful book are professional academics and intellectuals who grew up in different socialist countries. Exploring socialist childhoods in myriad ways, they draw on memories and collective history, emotional insider knowledge, and the measured perspective of an analyst. What emerges is life that was caught between real optimism and dullness, ethical commitments and ideological absurdities, selfless devotion to children, and their treatment as a political resource. Such attention to detail and examination of the paradoxical nature of this time makes this collective effort not only timely but remarkably genuine. Alexei Yurchak, University

of California USA Class, Politics and the Economy (Routledge Revivals) Stewart Clegg, Paul Boreham, Geoff Dow, 2014-11-06 This study first published in 1986 provides a systematic account of the processes and structure of class formation in the major advanced capitalist societies The focus is on the organizational mechanisms of class cohesion and division theoretically deriving from a neo Marxian perspective Chapters consider the organization and structure of the corporate ruling class the middle class and the working class and are brought together in an overarching analysis of the organization of class in relation to the state and the economy This title will be of particular interest to students researching the impact of recession on societal structure and the processes of political class struggle as well as those with a more general interest in the socio economic theories of Marx Engels and Weber *On the Question of Truth in the Era of Trump*, 2020-04-28 Using a range of critical perspectives *On the Question of Truth in the Era of Trump* closely examines notions of truth in crisis leading up to and after the election of Donald Trump The authors explore how truth is constructed along the lines of race social class and gender as filtered through the self referential characteristics of social media in particular The authors assert that the US left has shown itself inadequate to the task of confronting right wing ideologies which have only intensified since the 2016 election resulting in increased mobilization of white supremacist and nationalist groups Whether underestimating Trump by downplaying the threat of his candidacy during the primaries trivializing the concerns of women and minorities as identity politics or rushing to prioritize the free speech rights of the far right left academics and the media have found themselves unable to use their traditional arsenal of evidence rational discourse and appeals to diversity of viewpoints The authors assert that political resistance to the right is not a matter of playful use of signs and symbols or discourse alone and has to be fought directly and in solidarity At this point it is clear that Trump and his supporters have not just deployed relativism as a form of strategy but have fully weaponized it against their perceived enemies women immigrants minorities LGBTQ people along with educational scientific and journalistic institutions It is hoped that this in depth critical dissection of truth in the current political reality will assist in the project of resistance Contributors are Faith Agostinone Wilson Mike Cole Jeremy T Godwin Jones Irwin Austin Pickup Daniel Ian Rubin and Eric C Sheffield Notes on books Longmans, Green and co, 1885 *Mission Textbook* Eckhardt Fuchs, Kathrin Henne, Steffen Sammler, 2022-04-11 Textbook revision and research have historically been two of the central pillars of the work of the Georg Eckert Institute and remain so today The history of the Institute demonstrates just how intertwined they are Against this backdrop the development of the Institute is presented and critically examined from different perspectives using a broad range of source materials The book pays particular attention to the collection of textbooks for the humanities and social sciences which has been important from the beginning and is now the largest in the world The history of the Institute illustrates how academic perspectives as well as political and financial instruments related to textbook research and revision have changed as part of the shift from bilateral cooperation to global networks The Institute has always responded to changing social contexts and its
