Conversion of Computer Software John R. Wolberg,1983 **Barrier-Free Design** James Holmes-Seidle,2012-08-21

This book for architects interior designers building managers students conference organisers looks at first principles to provide the user with the tools to make their own decisions rather than a cookbook approach It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects For the first time the book considers the needs of people with visual hearing and mental disabilities who make up the majority of disabled people in the population alongside those of people with physical mobility disabilities Practical low cost solutions to retro fitting existing buildings are discussed as well as the methods used to assess the suitability of an existing building and assembling a project to improve access for disabled people Specific products and designs are illustrated and discussed with full working technical drawings and full specification details These will reduce considerably the research time needed to produce a cost effective solution that will improve access for disabled people A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area
