Informing Energy and Climate Policies Using Energy Systems Models George Giannakidis, Maryse Labriet, Brian Ó Gallachóir, GianCarlo Tosato, 2015-04-06 This book highlights how energy system models are used to underpin and support energy and climate mitigation policy decisions at national, multi-country, and global levels. It brings together for the first time in one volume a range of methodological approaches and case studies of good modeling practice on a national and international scale from the IEA ETSAP energy technology initiative. It provides insights for the reader into the rich and varied applications of energy system models and the underlying methodologies and policy questions they can address. The book demonstrates how these models are used to answer complex policy questions including those relating to energy security, climate change mitigation, and the optimal allocation of energy resources. It will appeal to energy engineers and technology specialists looking for a rationale for innovation in the field of energy technologies and insights into their evolving costs and benefits. Energy economists will gain an understanding of the key future role of energy technologies and policy makers will learn how energy system modeling teams can provide unique perspectives on national energy and environment challenges. The book is carefully structured into three parts which focus on: i) policy decisions that have been underpinned by energy system models; ii) specific aspects of supply and end use sector modeling including technology learning and behavior; and iii) how additional insights can be gained from linking energy system models with other models. The chapters elucidate key methodological features backed up with concrete applications. The book demonstrates the high degree of flexibility of the modeling tools used to represent extremely different energy systems from national to global levels.

Transparency in Assessment - Exploring the Influence of Explicit Assessment

Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

Posthuman Bliss? Susan B.

Levin, 2020-12-03 A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well. Advocates of transhumanism or radical enhancement urge us to pursue the biotechnological heightening of select capacities above all cognitive ability so far beyond any human limit that the beings with those capacities would exist on a higher ontological plane. For proponents of such views, humanity's self-transcendence through advancements in science and technology may even be morally required. Consequently, the human stakes of how we respond to transhumanism are immeasurably high. In *Posthuman Bliss: The Failed Promise of Transhumanism*, Susan B. Levin challenges transhumanists' overarching commitments regarding the mind and brain, ethics, liberal democracy, knowledge and reality, showing their notion of humanity's self-transcendence into posthumanity to be little more than fantasy. Uniting philosophical with scientific arguments, Levin mounts a significant challenge to transhumanists' claim that science and technology support their vision of posthumanity. In a clear and engaging style, she dismantles transhumanists' breezy assurances that posthumans will emerge if

we but allocate sufficient resources to that end Far from offering theoretical and practical proof of concept for the vision that they urge upon us Levin argues transhumanists engage inadequately with cognitive psychology biology and neuroscience often relying on questionable or outdated views within those fields Having shown in depth why transhumanism should be rejected Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy This holism is thoroughly human in the best of senses It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read, decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending, tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic, social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development, improvement or scaling up of budget literacy initiatives

Thomson,2001 The Ecclesiastical History by Socrates Scholasticus had an unusual transmission in Armenia In 695 the first translation made in the sixth century was completely revised It was much abbreviated and changed while at the same time additions of various kinds were introduced Now for the first time that adapted text of the Ecclesiastical History is translated from the classical Armenian In this English rendering all the additions to the original text are highlighted and studied from the perspective of earlier Armenian literary and theological traditions The Introduction assesses the possible motives for this adaption of a well known History at the end of the seventh century Similar Armenian reworkings of foreign Histories the Georgian Chronicles and the Syriac Chronicle of the Patriarch Michael are much later Within Armenia the secondary version of Socrates became more influential than the first more exact translation The present book is thus of value for the study of Armenian history and theology in the period following the break with the imperial church of Constantinople
