Creating the New African University, 2023-05-25 Creating the New African University grapples with the existence of African universities, particularly in post-independent Africa, where Higher Education Institutions (HEIs) are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies. The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good. It engages issues within the context of how post-colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies. This book further highlights an urgent need to do away with silos and embrace a multidisciplinary, interdisciplinary, transdisciplinary and cross-disciplinary dialogical approach towards knowledge generation. Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social, economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements.

Provides a comprehensive introduction to African freshwater rivers, their biota and abiotic processes. Contains unique case studies on African streams and rivers. A Scientific Bibliography of the Far Northern Drakensberg Rodney Moffett, 2023-04-14 This Scientific Bibliography of the Far Northern Drakensberg is a continuation by the Afromontane Research Unit of the University of the

Free State ARU to document published and other similar works on the mountains of the summer rainfall area of South Africa. It follows A Scientific Bibliography of the Drakensberg Maloti and Adjacent Lowlands which was published in 2020 Moffett 2020 and which covered the area between the North Eastern Cape and the North Eastern Free State. The current work extends this northward by including articles and publications dating back to 1875 E Cohen on the Lydenburg goldfields reaching as far as the Wolkberg and Woodbush near Tzaneen in Limpopo Province. Figure 1 shows the boundary of the area covered and although referred to as the Far Northern Drakensberg in this work it is identical to that described as the LMEE Limpopo Mpumalanga Eswatini Escarpment by Clarke et al 2022. Although slightly separate from the lower escarpment the mountainous Barberton and adjacent Eswatini area as well as the Leolo Mountains in eastern Sekhukhuneland are also included. Details on how the boundary in figure 1 was determined are given in Clark et al 2022. Bibliographies on two further ranges in the summer rainfall area viz the Magaliesberg in Gauteng province and the Soutpansberg in Limpopo province are to be the subject of future compilations.
