This new expanded edition provides a 20 year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education equity programs and research. Key features include:

- Expertise: Like its predecessor, over 200 expert authors and reviewers provide accurate consensus research based information on the nature of gender equity challenges and what is needed to meet them at all levels of education.
- Content Area Focus: The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters, including mathematics, science and engineering.
- Global Diversity Focus: Global gender equity is addressed in a separate chapter, as well as in numerous other chapters.
- Gender Equity Strategies for Diverse Populations: Contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students.
- Action Oriented: All chapters contain practical recommendations for making education activities and outcomes more gender equitable.
- A Final Chapter: Consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education.

New Material: Expanded from 25 to 31 chapters, this new edition includes more emphasis on male gender equity and on sexuality issues, special within population gender equity challenges, race, ability, and disability, etc.

Coeducation and single sex education, increased use of rigorous research strategies such as meta analysis showing more sex similarities and fewer sex differences, and of evaluations of implementation programs, technology and gender equity is now treated in three chapters.
