NOKIA **5800** **XPRESSMUSIC** **RM-356/RM-428**

Introduction

Important:

This document is intended for use by authorized service centers only.

"Service Schematics" was created with these considerations:
The purpose of this document is to provide further technical repair information for
Mobile, mobile phones or fixed line service activities;
It contains additional information such as e.g. "Component Index".

Handling process time and improving the repair quality is the aim of this document.
It is to be used additionally to the service manual and other training
or vendor information such as Service Bulletin.

While every endeavor has been made to ensure the accuracy of this document, some
errors may exist. If the reader finds any errors, please should be notified in writing.

[Digital Image and Signal Processing for Measurement Systems](#) J. Richard Duro,Lopez Fernando Pena,2022-09-01 This book provides an overview of advanced digital image and signal processing techniques that are currently being applied in the realm of measurement systems The book is a selection of extended versions of the best papers presented at the Sixth IEEE International Workshop on Intelligent Data Acquisition and Advanced Computing Systems Technology and Applications IDAACS 2011 related to this topic and encompass applications that go from multidimensional imaging to evoked potential detection in brain computer interfaces The objective was to provide a broad spectrum of measurement applications so that the different techniques and approaches could be presented Digital Image and Signal Processing for Measurement Systems concentrates on signal processing for

measurement systems and its objective is to provide a general overview of the area and an appropriate introduction to the topics considered. This is achieved through 10 chapters devoted to current topics of research addressed by different research groups within this area. These 10 chapters reflect advances corresponding to signals of different dimensionality. They go from mostly one dimensional signals in what would be the most traditional area of signal processing realm to RGB signals and to signals of very high dimensionality such as hyperspectral signals that can go up to dimensionalities of more than one thousand. The chapters have been thought out to provide an easy to follow introduction to the topics that are addressed including the most relevant references so that anyone interested in this field can get started in the area. They provide an overview of some of the problems in the area of signal and image processing for measurement systems and the approaches and techniques that relevant research groups within this area are employing to try to solve them which in many instances are the state of the art of some of these topics
